B.Sc. – TECHNICAL TEXTILES
REGULATIONS, CURRICULUM & SYLLABUS

ABOUT SVPITM

SVPITM is a one of its kind institute which is primarily devoted for Textile Management excellence. To cater to the needs of students' community it offers UG and PG programmes in Textiles and Management. With more than 15 years of heritage, SVPITM has carved a niche in the field of Textile and Management education. Our methodology for producing industry ready candidates and entrepreneurs is based on experiential learning through practical workshops, real-time projects, working alongside with industry professionals as mentors.

This institute is an autonomous entity governed by the Ministry of Textiles, Government of India. All the academic programmes are offered in collaboration with the Central University of Tamil Nadu (CUTN). The core culture and philosophy of SVPITM is to keep students at the forefront of modern textile and management practices through innovative pedagogy blending theoretical knowledge with practical application to succeed in the global business world.

In the rapidly changing economic and business landscape, need for managers with the global perspective and personal competencies to drive diverse teams has become even more important for organizations. We continually strive on best approach to empower the students to harness their potential strengths and to emerge as positive, well-informed, ethical and confident individuals.

Right from inception we have been training executives, preparing the participants for a world in constant evolution, a world that needs leaders capable of utilizing innovation to turn challenges into opportunities. At SVPITM, innovation is the way of life.

VISION & MISSION

Vision

To emerge as an internationally renowned center of excellence in textile management education, creating a strong cadre of professional managers who will become inspiring performers and decision makers, capable of attaining high standards and competitive edge to bring the Indian textile industry to the forefront

Mission

Our Mission is to impart vibrant, comprehensive and innovative learning to our students enabling them to be managers, entrepreneurs, and leaders with strong cultural values and to provide an ambience to develop their skills to meet the challenges of the global business environment.

I. GOVERNANCE POLICIES

1. STUDENT BEHAVIOUR IN THE CAMPUS

- a. Discipline includes the observance of good conduct and orderly behavior by the students of the Institute.
- b. The following and such other rules as framed by the Institute from time to time shall be strictly observed by the students of the Institute.
 - ✓ Every student of the Institute shall maintain discipline and consider it his /her duty to behave decently at all places. Men student shall, in particular, show due courtesy and regard to women students.
 - ✓ No student shall visit places or areas declared by the Institute as “Out of Bounds” for the students.
 - ✓ Every student shall always carry on his / her personal Identity Card issued by the Institute.
 - ✓ Every student, who has been issued the Identity Card, shall have to produce or surrender the Identity Card, as and when required by the Institute Staff, Teaching and Library Staff and the Officials of the Institute.
 - ✓ Any Student found guilty of impersonation or of giving a false name shall be liable to meet disciplinary action.
 - ✓ The loss of the Identity Card, whenever it occurs, shall immediately be reported in writing to the class advisor.
 - ✓ If a student is found to be continuously absent from classes without information for a period of 15 days in one or more classes, his / her name shall be struck off the rolls. He/she may, however, be readmitted within the next fortnight on payment of the

prescribed readmission fee etc. He / She will not be readmitted beyond the prescribed period.

- c. Breach of discipline, interlaid, shall include:
- ✓ Irregularity in attendance, persistent idleness or negligence or indifference towards the work assigned.

3. LIBRARY

The library is stacked with latest books and reference materials. The library has been provided with the ERP Software having a multi-functional facility. The library holds over 8,000 volumes of books and rich collection of journals. In addition the library possesses audio-visual and multimedia documents. Apart from this, it also provides online sources and reprographic facilities. The library subscribes to online data bases to enhance the knowledge base of students. The time, rules and regulations of library are given below.

a. Library Timings

- ✓ Monday to Friday – 9.00 am to 5.30 pm
- ✓ Saturday (Excluding second & last Saturday of month) – 9.00 am to 4.30 pm

b. Rules and Regulations

- ✓ Students should register their entry and exit to access the Library.
- ✓ Books, bags, and other belongings are not allowed inside the Library.
- ✓ Students are allowed to take maximum of three books for a period of fourteen days. They may be allowed for further renewal if there is no demand for that particular book. If the books are not returned within the due date, Rupee one will be charged per day per book till the return of the books.
- ✓ Reservation facility is available on issued books.
- ✓ Books will be issued upto 5.30 pm on all the working days except Saturdays.
- ✓ ID card should be produced at the time of issuing books.
- ✓ Issue of books through the ID card of other students is strictly prohibited.
- ✓ Loss of book is to be replaced by the same copy or by double the cost of the book.
- ✓ Silence to be maintained inside the library. Group activity to be avoided inside library.
- ✓ Stealing, damaging the property of the library, misbehaviour with any-one in the library will be considered an act of indiscipline and misconduct. The student

involved may be denied library membership and reported for further action on account of their misconduct.

- ✓ Any book issued must be shown for verification to the person on duty at the library gate.
- ✓ Marking, defacing or damaging any library property is a gross misconduct.

c. Library Facilities

The SVPITM Library provides the following facilities to the users.

- ✓ WEB OPAC facility to access library books and journals.
- ✓ Online Journals.
- ✓ Online News Papers.
- ✓ e-Books.
- ✓ Reprography facility is available inside the campus on cost basis.

d. Lending Rules

- ✓ Reference book, journals or magazines, summer training reports or dissertation reports (including back issues) will not be issued to students. They are to be used only in the Library.
- ✓ The Librarian reserves the right to recall any book issued to the borrower even prior to the due date of return, if necessary.
- ✓ Maximum of three books will be issued to the students for the period of fourteen days.
- ✓ Maximum of five books will be issued to the faculty members for the period of sixty days.
- ✓ If a student fails to return the book on due date or fails to get it re-issued on the due date, a fine of Rupee One per day per book will be charged for each book after the due date.

4. COMPUTER LAB

The institute campus is equipped with networked computers and other IT equipment. Internet browsing with broadband facility is available other than class hours during college working time. Facilities like printing & scanning are also extended to students.

a. I T Guidelines

I. The Institute and its IT resources

The Institute makes Information Technology services available to the students in varied forms:

- ✓ The Institute network comprises of secured network with the latest Hardware, Firewall & Antivirus software.
- ✓ The Institute network comprises DNS Server, ERP Server, and Online e-Learning software with the latest Processor with desktop computers setup.
- ✓ The Institute has centralized computing facility. Audio visual equipment is available in the classroom and in the seminar hall.

- ✓ Access to High-speed internet is available in all the computers except the computers in the class rooms. In addition to this National Knowledge Network Connectivity from BSNL is also available for students.
- ✓ Reprographic facility is made available inside the campus for the students as well as for the faculty members.
- ✓ Scanning facility is available in the Computer Laboratory, Library, Controller's office (Multi-function Device) and Academic section.
- ✓ The computers assigned to the group / department may be utilized effectively by the group on time-share basis.
- ✓ The Faculty, Staff and students are provided with individual user-IDs in the Institution domain server through which they can interact among themselves. Moreover, we have separate individual email-IDs to our faculty and staff for official purpose through the web mail.
- ✓ The group or individual or department are being assigned with the computers or workstations, which means that the individual / department are responsible for the machine's safety. However the IT department may provide suggestions to keep it safe and in working condition.
- ✓ In case of any requirement, the group / department should provide information about the usage of the computing equipment.
- ✓ The Institute owns Software licenses for various System Software as well as Application software.
- ✓ The Secured Wi-Fi Connectivity is available in the campus as well as in the hostels.

II. DOs and DON'Ts for using the resources

- ✓ Students must wear a valid ID card before entering the Computer Lab
- ✓ While entering the computer laboratory, students must make an entry in the register book kept in the computer laboratory and also at the time of exit from the lab. Students are expected to maintain perfect silence and good discipline.
- ✓ Students are not allowed to bring in bags, pouches, food and beverages inside the Lab
- ✓ Mobile phone should be in switched off mode.
- ✓ Before leaving lab, students must shutdown the system, keep the place clean and rearrange the chairs in appropriate place.
- ✓ During the class hours students are not allowed to use the computer lab. If necessary, they can get permission from the concerned class faculty, Program coordinator and Lab in charge. They should submit the lab access form to the lab in charge, unless they will not be allowed to enter into the lab.
- ✓ You can back up your data regularly in the additional drives available in the local machine itself.
- ✓ Use of any media (CD / DVD / Pen Drive) or transfer of files from digital camera or any storage media to the network storage is subject to permission from the network administrator. Usage of pen drive is allowed only after scanning for virus.

- ✓ No user is allowed to login a computer as administrator. He / She is only an ordinary user with assigned individual / group user – id.
- ✓ Inform and seek permission from the IT department (recommended procedure) while transferring / shifting devices (such as desktop computers, laptops) from one place to other inside the campus for any task.
- ✓ In case of any requirement in taking laptops / projectors or any devices outside the campus, acquire a gate pass from the administrative office.
- ✓ Do not try getting data of others from the computer or the network.
- ✓ Taking a photograph using any media in the laboratory is prohibited.
- ✓ Do not login with the login-id of others or do not lend your login id and password to others. Any data loss thereby may not be retrieved.
- ✓ The students have to send a request to the library for any hard copy print by listing the file, location and page numbers of the content for print and collect only during the break hours. Users have to enter in the log book and collect the print out. This procedure applies to copying / writing data in CDs also.
- ✓ Students can use their personal computers in the campus. But they are not permitted to connect to the LAN. Use of software without license in the laptop and accessing the internet through institute network is strictly prohibited. Software piracy will not be entertained.
- ✓ Students are advised to maintain cleanliness inside the laboratory. Use of mobile phones, hearing songs and eatables are not allowed inside the laboratory (to be strictly followed by all the students in the computer laboratory, failing which the services will be denied.)

III. Storage, e-mail / Chat: Privacy, Responsibilities and Rules

- ✓ IT department has provided every user with a storage space in the network. As network share is available to students of that course, it is a common information sharing only and not to store individual / group's personalized data or irrelevant data like movies, songs etc.
- ✓ SVPITM procedures allow IT system administrators to view and monitor any files, including e-mail messages, in the course of diagnosing or resolving system related problems and maintaining information integrity. System administrators, as part of the job, will treat any such information on the systems as confidential. However, if the administrator comes across information that indicates illegal activity / content stored in the storage area, the content will be deleted without any notice and the user's work area will be barred.
- ✓ SVPITM's IT policy prohibits certain other kinds of usages. For example, using computers and the network used by individuals for commercial and individual purposes. Such cases if found will be brought to the attention of higher officials.
- ✓ Use of Messenger / Chat is prohibited inside the campus.
- ✓ Gaming is strictly prohibited. The web sites providing online gaming are not advised to be browsed. Any such activity if reported may block even the related beneficiary sites causing inconvenience to all other users in addition to denial of resources.

IV. Web Site Contents

- ✓ Individual users who are browsing will assume full responsibility for the content in Web pages, and they must abide by all applicable rules and policies of SVPITM.
- ✓ Information about the institute is available in the institute's official website viz. www.svpitm.ac.in and www.SVPITM.ac.in
- ✓ Any information to be uploaded in the website may be provided to the IT department with the approval from the Director's office.

b. Abuse and Action for Abuse of Computing Privileges

ABUSE

1. Unauthorized use or misuse of IT department property or records includes
 - a. Electronic data mishandling.
 - b. Willfully or negligently damaging or defacing records in common share or storage areas of individual courses.
 - c. Theft or unauthorized removal of records, property or other person's property.
 - d. Use of unrecognized / unauthorized storage media.
 - e. Any other abuse as found / amended from time to time.
2. Unfortunately, computer abuse, malicious behaviour and unauthorized account access do happen. If they are found, it should be reported immediately.

ACTION

- ✓ Denial of service of SVPITM's computing and communications resources for violation of policy are set by the various disciplinary entities, then communicated to and carried out by IT. In instances of immediate threat to the computing and communication systems, IT takes direct and immediate action to safeguard the resources it is charged to protect.
- ✓ When IT department is notified that a user appears to be abusing computing resources, all of his or her computing privileges may be suspended immediately when such an action is warranted to protect the computing resources and to assure reliable service to the rest of the community.

5. HOSTEL REGULATIONS

a. Behaviour and Discipline

- ✓ A hostel campus should be a place where students can have the best possible conditions for studying and adequate rest. As such due consideration must be accorded to other residents. Noise level must be kept low to allow others the opportunity to study or sleep in comfort. Television, Radio etc. provided in the common room must be switched off after 10:00 pm. These rules are intended to ensure a conducive environment for all residents.
- ✓ Residents shall not create or permit their guests or visitors to create any disturbance or other nuisance in the hostel that will interfere with the well-being of others.

- ✓ Smoking, chewing and spitting of pan, consumption of alcohol drinks and /or narcotic drugs in the hostel premises is strictly prohibited.
- ✓ Ragging in any form is prohibited. Punishments for ragging ranges from expulsion from hostel, debarring from exams to cancellation of admission. Ragging shall be treated as a serious offence and shall be dealt with as per the UGC Regulations.
- ✓ Social gathering in the hostel complex is not permitted without the prior and written consent of the warden.
- ✓ Hostel residents are not allowed to entertain unauthorized person(s). Anyone found in violation to this will be fined and penalized according to Institute rule.
- ✓ Resident students found in act of violence or misconduct outside the hostel premises is not the liability of the Warden or Institute administration. In such cases the resident student is responsible for himself/herself.

b. Upkeep of the Hostel

- ✓ Residents are responsible for keeping the hostel premises clean. Residents are advised to keep their room, the mess hall, common room, visitor's room, stair case and toilets and bathrooms clean at all time.
- ✓ All water taps, fans and electrical appliances must be turned / switched off when not in use.
- ✓ Noise level must be kept low to allow others the opportunity to study or sleep in comfort. Television, provided in the common room must be switched off or volume toned down after 10:00 pm. These rules are intended to ensure a conducive environment for all residents.
- ✓ The use of electrical appliances such as immersion heaters, electric stove/heater are forbidden in any of the room allotted for residence. Cooking, making tea etc is strictly prohibited in the room.
- ✓ Students shall conduct a room check to verify the inventory provided and endorse on the Check In/Check out Form. Any missing or damaged items must be reported to the hostel authority immediately. Otherwise, it will be assumed that all furnishings and fittings are in good order. The student will be responsible for any loss or damage thereafter.
- ✓ Resident(s) should not move any hostel property (table, chair, fan, cupboard, etc.) from one room to another. Any damage to hostel property must be reported immediately to the hostel authority/warden. Resident(s) will be charged for any damages except damages caused by normal wear and tear or faulty products/repairs.
- ✓ Residents will be personally responsible for the safety of their belongings. Residents are advised to keep their personal belongings and any other valuable items locked in their personal locker even when they are out for a short period. Any loss or theft of item(s) should be immediately reported to the hostel authority.
- ✓ Pasting of posters, writings, slogans and any kind of defacing the hostel in any form is not allowed.

- ✓ Electrician, contractors or any other service person may enter rooms as and when necessary in the course of their duty under the directive and permission from the warden only.
- ✓ The Hostel authority reserves the right to enter and inspect a hostel in the interests of health, safety and proper conduct of the students.
- ✓ Entry may also be made without prior notice, during normal hours, for the purpose of conducting non-emergency inspections. For repairs and maintenance purposes of showing the premises, students will be notified in advance by the hostel authority.

c. Entry and Timings

- ✓ It is required that residents of the hostel produce their Institute Identity card at the entrance of the hostel whenever he/she enters the hostel premises.
- ✓ Entry into the hostel is allowed till 7.00pm. Any late entries/night exits should be informed to the Warden in advance and permission to be obtained.
- ✓ Resident who wishes to stay out of hostel should duly inform the authority about the same.
- ✓ If any student is absent/does not return to the hostel after 24 hours without any information of his/her whereabouts, roommate(s) or fellow residents should inform the hostel authority immediately.

d. Visitors and Guests

- ✓ All visitors to the hostel including the parents/guardian will have to make necessary entries in the visitor's book available at the hostel entrance.
- ✓ Visitors are restricted to the visitor's lobby only.
- ✓ No visitors will be allowed inside the hostel premises after 7.00 pm.
- ✓ The visit of male guest(s) into female residence and vice versa is prohibited.

e. Allotment & Vacating of Hostel Accommodation

A limited hostel accommodation is available. It will be allotted on the basis of “**First come First Serve**” on full payment of one semester mess bill and hostel fees.

The criteria for allotment of hostel accommodation by the Institute are as under:

- i. **First Priority:** Students admitted to a full-time Programme of study and are from outside the state of Tamil Nadu.
 - ii. **Second Priority:** Students admitted to a full-time Programme of study and are from outside the Coimbatore district.
 - iii. **Third Priority:** Students from within the district of Coimbatore but living outside the Town agglomeration of Coimbatore.
 - iv. **Fourth Priority:** All others.
- ✓ Accommodation in the hostel is allowed initially for the current semester and is subsequently renewed subject to the continuing registration and fulfillment of academic requirements by the resident from time to time. All residents should subject themselves to the proof of registration and payment

of all hostel dues of the previous semester to be eligible to continue as resident of the hostel.

- ✓ The Director may allot accommodation to students, in exceptional situations, on case-to-case basis.
- ✓ The maximum duration of stay in the hostel is the normal prescribed period of the programmes of studies. Once the resident completed his/her Programme of studies, he/she is no longer a resident and is required to vacate the hostel.
- ✓ Terminal student must surrender his/her rooms to the concerned warden latest by last day in the case of even semester and last day in the case of odd semester.
- ✓ Resident who discontinues his/her studies from the Institute in the middle of a semester should clear all his/her mess dues and submit an application for vacating the hostel to the Senior Warden. Resident must hand over to the caretaker the complete charge of his /her room with all furniture and fixtures in tact at the time of vacating the room.

f. Constitution of the Hostel Committee:

The Hostel Committee shall have the following members:

- ✓ Warden who shall be ex-officio convener
- ✓ A senior member nominated by the Warden in consultation with the Director
- ✓ Two members of institute

g. Roles and Responsibilities of the Hostel Committee:

In principle, the Hostel Committee shall discuss and make recommendations regarding:

- ✓ Allotment
- ✓ Discipline of resident students
- ✓ Maintenance and development of the Hostel
- ✓ Matters related to Mess
- ✓ Any other matter pertaining to the Hostel

h. Hostel facility is available only for girl students.

6. ATTENDANCE, DISCIPLINARY & GRIEVANCE COMMITTEE

- a. This committee is constituted for the smooth functioning of the various activities of the Institute and it consists of the following members:

| | |
|--|-----------------------------|
| Head of the Department / Academic I/c. | - Chairman of the Committee |
| Controller of Examinations | - Convenor |
| Class Advisors | - Members |

- b. The Committee will deliberate the following matters.
- i. The matters relating to condonation and attendance shortages of students.
 - ii. All grievances and disciplinary problems of the students relating to malpractices in test, semester examinations, etc.

- c. The meeting of the committee will be convened by the Controller of Examination. The Committee will send periodical report and the recommendations to the Director for consideration / ratification / approval.

7. MENTORSHIP

To help the students in planning their courses of study and for getting general inputs regarding either the academic programme or any other activity, counselling every student will be assigned to a faculty member who will be the mentor. Student would be allotted for each faculty mentors by the Head – Textiles / Management.

8. MALPRACTICE IN EXAMINATIONS

- a. If a student is found copying in a test conducted for Continuous internal assessment, he / she will be given zero marks for that test and severely warned.
 - ✓ If a student is found copying in the end semester examination he/she will be debarred from writing that particular paper in that semester. Based on the nature of malpractice, he/she may be debarred for two more attempts of writing that paper/all papers. The disciplinary committee will make recommendations for necessary disciplinary action.
 - ✓ During the examinations the candidates shall be under the disciplinary control of the Chief Superintendent of the centre who shall issue the necessary instructions. If a candidate disobeys instructions or misbehaves with any member of the supervisory staff or with any of the invigilators at the Centre, he/she may be expelled from the examination hall for that session.
 - ✓ The invigilator shall immediately report the facts of such a case with full details of evidence to the Controller of Examinations who will refer the matter to the Discipline Committee. The Committee will make recommendations for disciplinary action.
- b. Every day, before the examination begins, the invigilators shall call upon all the candidates to search their personal things, tables, desks, etc., and ask them to hand over all papers, books, notes or other reference material which they are not allowed to have in their possession or accessible to them in the examination hall. When a late-comer is admitted this warning shall be repeated to him at the time of entrance to the examination hall. They are also to ensure that each candidate has his/her identification card and hall ticket with him/her.
- c. **Use of Unfair means:**

A candidate shall not use unfair means in connection with the examination. The following shall be deemed to be unfair means:

 - ✓ Found in possession of incriminating material related/unrelated to the subject of the examination concerned.

- ✓ Found copying either from the possessed material or from a neighbor or from any devices.
- ✓ Inter-changing of answer scripts.
- ✓ Change of seat for copying.
- ✓ Trying to help other candidates.
- ✓ Found consulting neighbor.
- ✓ Exchange of answer sheets or relevant materials.
- ✓ Writing register number of some other candidate in the main answer paper.
- ✓ Insertion of pre-written answer sheets (Main sheets or Additional Sheets).
- ✓ Threatening the invigilator or insubordinate behavior as reported by the Chief Superintendent and/or Hall Superintendent.
- ✓ Consulting the invigilator for answering the questions in the examination.
- ✓ Cases of impersonation.
- ✓ Mass copying.

Note:

- ✓ The Director may declare any other act of omission or commission to be unfair means in respect of any or all the examination.
- ✓ Where the invigilator in charge is satisfied that one third (1/3) or more students were involved in using unfair-means or copying in a particular Examination Hall, it shall be deemed to be a case of mass copying.

d.

- ✓ The Hall Superintendent of the examination centre shall report to the Controller of Examinations, without delay and on the day of the occurrence if possible, each case where use of unfair means in the examination is suspected or discovered with full details of the evidence in support thereof and the statement of the candidate concerned, if any, on the forms supplied by the Controller of Examinations for the purpose.
- ✓ A candidate shall not be forced to give a statement by the invigilator. The act of his/her having refused to make a statement shall be recorded by the invigilator and shall be attested by two other members of the supervisory staff on duty at the time of occurrence of the incident.
- ✓ A candidate detected or suspected of using unfair means in the examination may be permitted to answer the question paper, but on separate answer-book. The answer-book in which the use of unfair means is suspected shall be seized by the invigilator, who shall send both the answer-books to the Controller of Examinations with his report. This will not affect the concerned candidate appearing in the rest of the examinations.
- ✓ All cases of use of unfair means shall be reported immediately to the Controller of Examinations by the examiner, paper-setter, evaluator, moderator, tabulator or the person connected with the semester examination as the case may be, with all relevant material.

9. INSTITUTE – INDUSTRY INTERACTION

SVPITM provides practical industrial training. The students are taken to leading textile manufacturing units, textile research institutions, management institutes and export houses enabling them to get acquainted with the real time processes and the latest developments in the industry. Executives from Industry will deliver lectures and share their experiences on a regular basis with the students.

10. PLACEMENT ASSISTANCE CELL

A separate placement assistance cell is in place which is in constant touch with the leading textile manufacturing units, export units, overseas buying houses etc., and arrange campus recruitment. The placement cell at SVPITM consists of a faculty coordinator and student coordinators from the programmes B.Sc, BBA and MBA. The placement cell will facilitate in creating opportunities and directions for the registered students towards placements.

Rules and Regulations of Placement Cell

1. All the final year students are required to read the placement rules and regulations, interested students should sign the registration within two weeks from the commencement of classes for final year.
2. All the students are expected to know about various activities which would be planned from time to time depending on need from the student coordinators
3. Each student has to be a part of their respective mail groups through which they will be informed all details of the placement program.
4. The students will be duly informed through the student's coordinators and notice board about the companies interested in placing students and it is the responsibility of the students to get appraised of the happening of the placement cell.
5. Companies deemed to be fit for conducting campus interview in our institute will make their pre-placement presentation. Any clarification regarding the company may be done before the interview itself.
6. Students should make the decision of attending the interview based on the pre-placement presentations. Also they should come in full formal dress code to attend the same.
7. Till the official information about the selection of the candidates is received from the company, students are allowed to participate in other companies to a maximum of three chances.
8. Once the placement cell receives the official information about the selection, the selected student will not be allowed to attend any other company interview. This is to ensure the policy of "one man – one job" to all the students. However after all students are placed such students will be given option for their future appearance.
9. Following are considered as campus placement.
 - a. Student getting placement through campus placement interview coordinated by placement cell.

- b. Student getting placed on the basis of their on-going final project in the respective company.
 - c. Any other assistance from the institute.
- 10. Registration of the student in placement cell is considered to be cancelled due to following reasons.
 - a. Student not interested and not involved in the placement activities.
 - b. Student who is continuously absent / not attending interviews.
 - c. Student who is found by any means that they got the job personally and intentionally trying for better prospects through the institute.
 - d. Any misconduct or indiscipline by students inside the campus.
- 11. The above mentioned rules are subject to change and it is within the discretion of the placement cell.
- 12. By registering with the placement cell does not mean it is a guarantee for job.

11. CLASS COMMITTEE

- a. Each programme will have a Class Committee comprising the following members.
 - i. Chairman: Head – Management / Textiles
 - ii. All the faculty members handling courses for that class as members.
 - iii. Two students’ representatives with a minimum of 75% attendance during the semester shall be nominated by the class as members.
- b. The functions of the Class Committee will be as follows :
- c. The Class Committee shall meet post all CIA written tests.
- d. The first meeting will be held within two weeks from the date of commencement of classes for the semester.
- e. The class committee shall meaningfully interact and express opinions and suggestions to improve the effectiveness of teaching – learning process and analyse the performance of the students in the class test.
- f. The Class Committee Minutes and the action taken report will be submitted to the Director.

12. TEMPORARY BREAK OF STUDY FROM THE PROGRAMME

A student may be permitted by the Director to withdraw from the programme for a maximum duration of one year, for reasons of medical grounds, physical fitness or other valid reasons subject to the recommendations of the class advisor in consent with the Head – Textiles / Management. In such cases, the student will have to fulfil all conditions to redo the programme.

13. WITHDRAWAL FROM EXAMINATION

- a. A student may for valid reasons and on the recommendation of the class advisor in consent with Head – Textiles / Management, be granted permission to withdraw from appearing for the entire Semester Examination as one unit.

- b. Withdrawal application shall be valid, only if it is made 10 days before the commencement of the semester examination pertaining to the semester.
- c. Such withdrawal shall be permitted only once during the entire programme and shall not be construed as an appearance for the eligibility of a student for the award of classification.
- d. If a student falls sick in the due course of the Semester Examinations, he / she can withdraw from one or more courses.

14. PERFORMANCE ANALYSIS COMMITTEE

The Performance Analysis Committee will consist of Director as Chairman, Controller of Examinations as convenor and the members will be Head – Textiles / Management, all members of faculty and the class advisors. The meeting of the Performance Analysis Committee is to be held within four weeks from the last day of the semester examinations to analyse the performance of the students in all subjects of study (continuous and end semester).

15. RESULTS DECLARATION COMMITTEE

Results Declaration Committee will have Director as Chairman, Head – Textiles / Management and Controller of Examinations as members. After analysing the overall performance of the students in each course the committee is empowered to declare the results. If necessary, moderation of results will be done by this Committee. The findings and decisions of the performance analysis and results declaration committee is to be passed on to the Controller of Examinations immediately.

II. REGULATIONS

Definitions and Nomenclature

- a. Institute – Sardar Vallabhbhai Patel International School of Textiles and Management, Coimbatore.
- b. University / Collaborating University – Central University of Tamil Nadu, Thiruvavur.
- c. Programme – Bachelor of Science in Technical Textiles.
- d. Course - Every paper / subject of study offered under the programme.
- e. Curriculum - The various components / courses / labs in each programme that provides appropriate outcomes (knowledge, skills and attitude/behavior) towards the completion and objectives of the programme is called curriculum.
- f. Credits - Course work is measured in units called credit hours or credits.
- g. The number of lecture hours allocated for a course per week is the number of credits for that course. In case of practical and labs two hours will account for one credit.

1. QUALIFICATION FOR ADMISSION

- a. Students for admission to the B.Sc. Programme will be required to fulfil the minimum qualification as specified in the following table.

| S.No. | Programme | Minimum Qualification |
|-------|----------------------------|---|
| 1. | B.Sc. – Technical Textiles | A Pass in Plus two examination or equivalent of any recognized board in India with science stream/vocational stream with textile subjects, having 50% of marks for General and 45% marks for OBC (NCL)/SC/ST/PWD candidates |

- b. The Institute will prescribe from time to time other eligibility conditions for admission regarding the marks required to be secured by the student in the qualifying examination, minimum admissible percentage marks therein, permitted number of attempts for obtaining the qualifying examination, passing requirements in the respective entrance tests conducted by this institute for admissions, Central University Common Entrance Exams (CUCET) scores or other competitive entrance tests, physical fitness requirements, sponsorship etc.

2. DURATION OF THE PROGRAMME

- a. The duration of the programmes are as follows:

| Programme | Duration | |
|-------------------------------------|-------------|---------|
| B.Sc (Technical Textiles) Full-time | 6 Semesters | 3 Years |

The programme is designed with reference to the New Education Policy of Government of India.

- b. Exit options
- 6 semesters/3years – towards award of B.Sc Technical Textiles
- c. The duration of each semester will normally be 90 working days.
- d. A Student who is unable to complete the programme within the prescribed duration (6 semesters) may be allowed further to a maximum of 2 academic years after the completion of course duration to complete the programme after which the marks obtained through Continual Internal Assessment (CIA) will be void.

3. STRUCTURE OF THE PROGRAMME

- This program comprises of 14 Core courses, 7 Core laboratories, 4 Elective courses and 8 skill / ability enhancing courses and 3 skill / ability enhancing Laboratories along with 4 Language courses, namely 2 Tamil / 2 Hindi and 2 English comprising of 43 courses including internships and project work. The program will consist of total 142 up to 6th semester
- The student can choose the elective courses from the list specified for concerned semester. Elective courses can be chosen by the student groups who would specialize in that elective unanimously. If the students opting for an elective are not in a position

to have a consensus in selection of elective courses, rank order preference method would be adopted for finalizing the courses under electives.

- c. For the project work at sixth semester, student will be permitted by the Programme Co-ordinator to work on an independent project under the supervision of a faculty member from the Institute (Internal Guide) and if required, be under a corporate guide assigned by the organization (External Guide).
- d. The duration of the project will be three days per week during the sixth semester. At the end of the semester the student has to submit the project report.
- e. The first 6 semesters are designed to incorporate core competencies in the stream Technical textiles and can have an exit option after completion of 6 semesters, which will qualify for the award of degree of B.Sc Technical Textiles, subjected to fulfilling the minimum credit requirement for award of the degree.

4. VALUE ADDED COURSES

- a. As an initiative towards developing students as industry ready professionals and competent entrepreneurs, value added courses are introduced in final semester.
- b. The courses are prescribed during the sixth semester based on the inputs from the students, industry experts, feedback from the employers, industry readiness requirements, contemporary practices and trending topics at the time when the course is to be offered.
- c. The courses will be delivered by industry experts / external agencies / practitioners / academic experts in the respective discipline in which the course is designed. They bring the knowhow contemporary industry practices to the college doorstep.
- d. Multiple value added courses would be designed based on the said parameters and would be presented to the students for their choice of selecting two courses. A particular course would be delivered only if 40% of the batch strength opts for that course.
- e. Students shall choose minimum of two courses or more based on their interests and account the credit points.
- f. These value added courses are voluntary basis and credits obtained will be added to the course credit as mentioned under 3 a.
- g. These credits cannot be compensated to the course credit that is mentioned under 3 a.

5. SELF-INTEREST COURSES

- a. Our predominant focus today is to curate the wealth of information that is freely available on the web into high quality learning-outcome to one's interest, learning style and pace of learning.
- b. Self-learning courses based on the students' unique interests through open source learning is introduced among the students to make them gain a competitive advantage in the market.
- c. This flexible learning provides the students a broad spectrum of study.
- d. Each student can undergo one open source course through MOOC, SWAYAM, NPTEL etc., in sixth semester based on their interest which is related to the programme of study.

- e. These courses shall account to one credit on successful completion of the course as prescribed by the organizer. The credits such obtained will be added to the course credit as mentioned under 3 a.
- f. These credits cannot be compensated to the course credit that is mentioned under 3 a.

6. INTERNSHIP

With the consultation of a faculty guide and the coordinator, every student shall undertake suitable internships. Each internship shall be for a minimum of three weeks at an industry during the summer vacation. Report of the Summer Internship is to be submitted by the students within 15 days from the commencement of the third and fifth Semester respectively as per the format and guidelines specified by the coordinator for report preparation.

7. PROJECT WORK

Every student shall undertake a project work in the sixth semester in consultation with the faculty guide and the project coordinator. The project work shall be carried out in institution / industry / research organization. This project is to be carried out for duration of 12 week

8. ASSESSMENT OF THEORY COURSES

| ASSESSMENT | MARKS |
|--------------------------------|-------|
| Continuous Internal Assessment | 40 |
| End Semester Examinations | 60 |

Continuous Internal Assessment - Allotted marks are 40 for each theory course and the marks are inclusive of a written test and an assignment. The assignment can be in the form of article, seminar, presentation and etc. The choice of assignment is left with the faculty concerned.

- Two written exams (Continuous Internal Assessment Test I & II) with 90 minutes duration for 50 marks may be conducted and this will be converted to 20 marks for each course/subject.
- Students may be asked to submit at least two assignments in each course during each semester.
- Student should also present papers and participate in seminars conducted for each subject.
- Students may be asked pursue on and submit appropriate documents to one or more of the assessment methods.
- The presentations by students would be assessed based on RUBRICS.
 - CRITERIONS:
 - Contributions
 - Attitude

- Preparedness & Focus
- Quality of Work
- Timely completion

| POINTS | AWARD OF MARKS |
|----------------------|----------------|
| ≥ 90 | 10 Marks |
| ≥ 80 but < 90 | 8 Marks |
| ≥ 60 but < 80 | 6 Marks |
| ≥ 40 but < 60 | 4 Marks |
| $= 40$ | 2 Marks |

- Controller of Examinations will issue the schedule and conduct the written test. Award of internal marks by assessment through various methods specified is the responsibility of the faculty handling the particular course.
- The internal marks obtained by the students will be duly informed before the semester examinations.

The marks may be allocated as follows:

| | |
|---|-----------------|
| Written tests (Each test carries 10 marks) | 20 Marks |
| Assignments / Seminars / Case studies / Article review / Paper presentation / Publications / Field study / Concept viva / Test based on MCQs / Quizzes etc. | 10 Marks |
| Students' Presentation/mini project/any activity as decided by the respective subject faculty | 10 Marks |
| Total | 40 Marks |

Question Paper Pattern (CIA)

Total Marks: 50

Duration: 90 Minutes

PART A Answer Any Five

(5x3=15 Marks)

- 1.
- 2.
- 3.
-
- 7.

(Remember & Understand)

PART B Answer Any Two

(2x10=20 Marks)

- 8.
- 9.

10.

(Apply, Analyze & Evaluate)

PART C Compulsory Question (Case study)

(1x15=15Marks)

11.

(Evaluate & Create)

9. ASSESSMENT OF PRACTICAL COURSES

- a. List of exercise for the subjects that contain practical shall be designed by the faculty member who handles the subject for the semester and executed under his/her supervision. Record shall be maintained by the individual student for the exercises carried out.

- b. Maximum Marks for practical is 100 which consist of :

| Continuous Internal Assessment (Internal Marks) | End Semester (External Marks) |
|---|---|
| 60 | 40 |

- c. End semester exam for practical subjects which has credit, shall be conducted by the internal faculty member in the presence of an External Examiner. The Question paper shall be set by Internal Examiner in consultation with External Examiners and exercises are conducted for the duration designed by them. The assessment is carried out subsequently along with a viva-voce and the results for the same are forwarded to COE.
- d. Criteria for evaluation of practical courses may be as below or as framed by the course handling faculty based on the laboratory course.

| Type of assessment | Criteria | Maximum Marks | Total Marks |
|---|--------------------------------------|---------------|-------------|
| Continuous Internal Assessment (60 Marks) | Execution of Experiments /Exercises | 50 | 60 |
| | Preparation of Lab Record | 10 | |
| End Semester (40 Marks) | Execution of Experiments / Exercises | 20 | 40 |
| | Evaluation of Lab Record | 10 | |
| | Viva-Voce | 10 | |
| Total | | 100 Marks | |

10. EVALUATION OF INTERNSHIP & PROJECT: INTERNSHIP

- a. For evaluation of internship, the student will make a presentation of the report on a date to be announced by the Controller of Examinations. The Presentation and

Viva-voce will be evaluated by a team consisting of the faculty guide, the Internal Examiner and another faculty member nominated as the External Examiner.

- b. During the internship period students will make presentation once in a week to the concerned faculty guide, and the final presentation-cum-viva voce examination marks shall be allotted as follows :

| Type of assessment | Continuous Internal Assessment (Internal) | End Semester |
|---------------------------|--|---------------------|
| Weekly Review (3) | 45 | - |
| Observation | 15 | - |
| Report | - | 30 |
| Presentation & viva voce | - | 10 |
| Total (100) | 60 | 40 |

The internship report of the students shall be evaluated for a maximum of 100 marks of which 60 marks would be allotted for internal assessment and 40 marks would be allotted for external examination. A minimum of 20 marks should be obtained in external examination and in total 50 marks (Internal + External) should be obtained to pass.

PROJECT:

- a. During the project period students will make presentations to the faculty guide / faculty co-ordinator. The final presentation-cum-viva voce examination marks shall be allotted as follows:

| Type of assessment | Continuous Internal Assessment (Internal) | End Semester |
|---------------------------|--|---------------------|
| Project Reviews (3) | 60 | - |
| Report | - | 80 |
| Presentation & viva voce | 20 | 40 |
| Total (100) | 80 | 120 |

The project work of the students shall be evaluated for a maximum of 200 marks of which 80 marks would be allotted for internal assessment and 120 marks would be allotted for external examination. A minimum of 60 marks should be obtained in external examination and in total 100 marks (Internal + External) should be obtained to get pass.

- b. For evaluation of the project, the student will make a presentation of the Project work on a date to be announced by the Controller of Examinations. The Presentation and Viva-voce will be evaluated by a team consisting of an Internal Examiner and an External Examiner assigned by the Controller of Examination.

11. ELIGIBILITY CRITERIA FOR APPEARING IN EXAMINATIONS AND ATTENDANCE REQUIREMENT

- a. Students fulfilling the following criteria will be allowed to appear in the examinations:
 - (i) Paid all the fees and dues to the Institute
 - (ii) He/She has minimum prescribed attendance in a semester in all courses.
- b. The minimum required attendance is 75% which is calculated with the number of classes appeared in a semester and total number of classes conducted.
- c. If the student was not able to attend classes regularly due to a valid and convincing reason. He/She may get prior/immediate approval with the institute and condone the shortage. This case is only applicable if the student is shortage of 5% or less attendance.
- d. The students deputed by the Institute to take part in the extra and co-curricular events shall be given a concession of up to 5 percent attendance (only once throughout the programme of the study) if necessary, in addition to the relaxations in the attendance requirement as provided above. Such concession would be available for the days of actual participation in the event, including journey time with the prior approval of the Institute.
- e. The students who could not manage 75% attendance for two consecutive semesters have to repeat the semesters in the subsequent academic year. In such cases, the student will have to fulfill all the conditions to redo the programme.

12. END SEMESTER EXAMINATIONS

- a. End semester examinations will be scheduled by the COE / Director for all Practical and Theory courses. The filled in Application forms with the payment of Examination fee for the students is Rs. 300/- per course (including Practical) to be submitted to the COE section within the stipulated time. The question paper will be set by an external examiner.
- b. The End Semester Examination will be conducted for 100 Marks with a duration of 3 hours. A student should secure a minimum of 50 marks in the examination to get a pass in each course. Marks obtained by the students in the examination will be converted to 60%.
- c. A minimum of 50% (End Semester and Continuous Assessment) in each course is required for obtaining a pass and the grades.

Question Paper Pattern (ESE)

Total Marks: 100

Duration: 180 Minutes

PART A Answer all questions

(10x3= 30 Marks)

- 1.
- 2.
- 3.
- 4.

- 5.
- 6.
- 7.
- 8.
- 9.
- 10.

(Remember & Understand)

PART B Answer all questions

(5x10=50 Marks)

11. A or
B
12. A or
B

13. A or
B

14. A or
B

15. A or
B

(Apply, Analyze & Evaluate)

PART C Compulsory question

(1x20=20 Marks)

- 16.

(Evaluate & Create)

13. MOVEMENT TO HIGHER SEMESTER

- a. Every student should register for the next semester along with the statement of results of the previous semester, proof of payment of tuition fees and mess fees (if applicable).
- b. The following students would not be allowed to proceed to the next semester and would have to complete the semester which they had not completed only at the next available opportunity.
 - i. Students who had failed to gain the minimum attendance in one or more courses conducted in the preceding semester
 - ii. Students who had not completed the academic requirements for the course(s) in the preceding semester
 - iii. Students who had been barred from taking the continuous internal assessment and or end semester examination for a course(s) other than valid reasons or medical grounds as approved by Director of the institute
 - iv. Students who have got pending payments due to the institute

- v. Students who are barred in the preceding semester on grounds and practices of indiscipline
- c. A student who is permitted to discontinue may re-join the programme at the appropriate semester only along with the students enrolled at the time of regular commencement of that semester as per the academic schedule of the institute.
- d. A student who discontinues and re-joins shall be governed by the rules, regulations, courses of study and syllabus followed, at the time of his / her re-joining the programme.
- e. Any student appearing for supplementary examinations in any subject, two years after the first registration for that subject, will be governed by the regulations and syllabus followed at the time when the supplementary examination is taken.

14. PERFORMANCE EVALUATION SYSTEM

- a. **Assessment of a subject** will be done on mark basis. The Performance Analysis Committee shall meet within three weeks after the completion of all examinations to analyse the performance of students in all assessments (continuous and end semester) for each course.
- b. **The letter grades and the corresponding grade points** are as follows:
Grading system for the programme is as follow:

| Marks Range | Corresponding Grade | Grade Point |
|---------------------------|----------------------------|-------------|
| Below 50 | RA (Re- Appearance) | N.A |
| 50 and above but below 60 | B (Above Average) | 6 |
| 60 and above but below 70 | B+ (Good) | 7 |
| 70 and above but below 80 | A (Very Good) | 8 |
| 80 and above but below 90 | A+ (Excellent) | 9 |
| 90 and above 100 | O (Outstanding) | 10 |

Classification

A student in order to be eligible for the award of the Degree must obtain a minimum of “B” grade in each course. The results of successful candidates will be classified as indicated below on the basis of the Cumulative Grade Point Average (CGPA):

| S. No. | Range of CGPA | Classification (Provided the student pass all courses in the first attempt) |
|--------|--------------------------------------|--|
| 1 | CGPA of 8.0 and above and up to 10.0 | First Class with Distinction |
| 2 | CGPA of 6.5 and above and up to 7.9 | First Class |
| 3 | CGPA of 5.5 and above and up to 6.4 | Second Class |

15. REVALUATION OF ANSWER SCRIPTS

Within one week from the announcement of examination result, a student may ask for photocopies of his / her semester / supplementary examination answer paper in any subject on payment of Rs. 400/- per course through proper application to the Controller of Examinations. Subsequently, within a week's time he / she can opt for revaluation if he / she so desires, on payment of Rs. 500/- per course through proper application to the Controller of Examinations.

16. SUPPLEMENTARY EXAMINATIONS

Supplementary examination for failed students will be scheduled along with the semester examinations. Students registering for supplementary examinations at the end of any semester should register for the courses he / she intends to appear by submitting application in the prescribed form with the prescribed fee of Rs.300/- per subject for B.Sc Programme to the Controller of Examinations. The candidates can appear for the supplementary examinations for the maximum period of 2 years from their period of study.

17. GRADE SHEET

- a. After the results are declared, Grade Sheets will be issued to each student which will contain the list of subjects for that semester and the grades obtained by the student.
- b. Grade Point Average (GPA) for each semester will be calculated only for those students who have passed all the subjects of that semester. Similarly, Cumulative Grade Point Average (CGPA) up to any semester will be calculated only for those students who have passed all the subjects up to that semester. GPA is calculated as follows:

$$\text{GPA} = \frac{\sum (C_i * GP_i)}{\sum (C_i)}$$

Where C_i - is the credit assigned to the course

GP_i - is the grade point obtained by the student

- c. On successful completion of the programme, the CGPA is calculated as follows:

$$\text{CGPA} = \frac{\sum (C_i * GP_i)}{N}$$

Where C_i - is the credit assigned to the course

GP_i - is the grade point obtained by the student

N - is the total number of credits for the entire programme

18. CONSOLIDATED STATEMENT OF GRADES

- a. At the end of the programme, all successful students will be furnished with a consolidated statement of grades which will contain the following particulars :
 - i. Grades in the courses of the semesters
 - ii. CGPA
 - iii. Classification (First class with Distinction / First class / Second class.
- b. A student who has completed the minimum period and has undergone all the courses specified in a programme may be given a course completion certificate.
- c. At the end of the programme all successful students can apply for the provisional certificate on payment of prescribed fees of Rs.500/- through proper application to the CoE.

19. ELIGIBILITY TO AWARD B.Sc., - Technical Textiles

A student shall be eligible for the award of B.Sc, Technical Textiles if the student has,

- a. Undergone the prescribed programme of study and has passed in all the courses specified for the programme including the value added courses and self-interest courses.
- b. No dues to the Institute, Library, Hostel etc.,
- c. No disciplinary action pending against him / her.

20. WITHDRAWAL FROM EXAMINATION

A student may for valid reasons and on the recommendation of the Programme Co-ordinator, be granted permission to withdraw from appearing for the entire Semester Examination as one unit. Withdrawal application shall be valid, only if it is made 10 days before the commencement of the semester examination pertaining to the semester. Such withdrawal shall be permitted only once during the entire programme and shall not be construed as an appearance for the eligibility of a student for the award of classification specified. If a student falls sick in the middle of the Semester Examinations, he / she can withdraw from one or more courses.

Curriculum

Bachelor of Science - Technical Textiles

1. Programme Objectives

1. Graduates of this programme will be able to apply acquired knowledge to identify the scope and provide appropriate solution in the appropriate discipline.
2. The graduate shall showcase the skills to define and develop innovative ideas and implementation for various demands.
3. A successful graduate will be able to research and optimize the products and processes of the textile chain.
4. Graduates of the programme will have necessary expertise to establish oneself as an entrepreneur.

2. Programme Outcomes

1. Able to apply knowledge to develop functional and protective products to meet the social need.
2. Able to design the better manufacturing technique to develop quality and cost effective functional products by applying knowledge of research and product development for future sustainability.
3. Illustrate special manufacturing techniques for state-of-the-art product development and production with conformity to various quality regulations
4. Able to establish, manage and supervise the business operations.

| ELECTIVE COURSES (EC) | |
|------------------------------|---|
| 22BSTT35 (A) | Clothing Comfort |
| 22BSTT35 (B) | Coated and Laminated textiles |
| 22BSTT45 (A) | Smart and wearable textiles |
| 22BSTT45 (B) | Textile reinforced composites |
| 22BSTT54 (A) | Industrial Management |
| 22BSTT54 (B) | Apparel marketing and merchandising |
| 22BSTT55 (A) | Total Quality Management for Textile Industry |
| 22BSTT55 (B) | Retail Management |

List of Value Added Courses:

- Marketing and Merchandising
- Intellectual Property Rights
- Digital Marketing
- Artificial Intelligence (AI)
- Industry 4.0
- Internet of Things (IoT)

The courses may be offered as per the requirement of the industry and choice of the students. The list may be updated as per the recent trends.

BACHELOR OF SCIENCE – TECHNICAL TEXTILES
SYLLABUS

SEMESTER I

22BSUG11- Tamil - I

குறிக்கோள்கள்:

- பாரத நாட்டின் பெருமை, தற்போதைய சமூக நிகழ்வுகளையும் மனித உணர்வுகளையும் புது கவிஞர்கள் வாயிலாக மாணவர்களுக்கு உணர்த்துதல்
- வாழ்வில் பின்பற்றவேண்டிய தனி மனித சமூக ஒழுக்கங்களை சிறுகதை மற்றும் உரைநடை வாயிலாக மாணவர்களுக்கு உணர்த்துதல்

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| | 1 | 2 | | | |
| PO | | | | | |
| i. | | | | | |
| ii. | | | | | |
| iii. | | | | | |
| iv. | M | M | | | |

அலகு - 1 (செய்யுள்)

- 1.பாரதியார் – பாரத நாடு
- 2.பாரதிதாசன் - உலகம் உன்னுடையது
- 3.நாமக்கல் கவிஞர் இராமலிங்கம் பிள்ளை- சூரியன் வருவது யாராலே
- 4.அழ.வள்ளியப்பா - ஒரு வரம் கண்ணாடி
- 5.கண்ணதாசன் – யாத்திரை

அலகு - 2 (செய்யுள்)

1. மு. மேத்தா - மரங்கள்
2. வைரமுத்து - சுதந்திரம்
3. ஈரோடு தமிழன்பன்- அகல் விளக்காக இரு
4. அப்துல் ரகுமான்- கண்ணீரின் ரகசியம்....
5. மாலதி மைத்ரி- குருவி

6. வத்ஸலா - நான் ஆலமரம்

அலகு - 3 (இலக்கணம்)

- 1.வல்லெழுத்து மிகும் இடங்கள்
- 2.வல்லெழுத்து மிகா இடங்கள்

அலகு-4 (இலக்கிய வரலாறு)

- 1.மரபுக்கவிதையின் சிறப்பு இயல்புகள்
- 2.புதுக்கவிதையின் சிறப்பு இயல்புகள்
- 3.சிறுகதையின் தோற்றமும் வளர்ச்சியும்
- 4.உரைநடையின் தோற்றமும் வளர்ச்சியும்

அலகு-5

1. அறம் எனப்படுவது - முனைவர். அமுதன்
2. அழகோ அழகு - வெ. இறையன்பு

பாட புத்தகம்:

1. அறம் எனப்படுவது (முனைவர். அமுதன்) – நியூ செஞ்சுரி புக் ஹவுஸ் பி லிட், 41பி, சிட்கோ இண்டஸ்டிரியல் எஸ்டேட், அம்பத்தூர், சென்னை-600098
2. அழகோ அழகு - வெ. இறையன்பு - நியூ செஞ்சுரி புக் ஹவுஸ் பி லிட், 41பி, சிட்கோ இண்டஸ்டிரியல் எஸ்டேட், அம்பத்தூர், சென்னை-600098

குறிப்பு புத்தகம்:

1. தீந்தமிழ் இலக்கணம் (க. வெள்ளிமலை எம்.ஏ.) – ஐவரி அச்சகம், சென்னை – 600005
2. இலக்கணம் இலக்கிய வரலாறு மொழித்திறன் (பேராசிரியர்.முனைவர். பாக்யமேரி) – பூவேந்தன் பதிப்பகம், மயிலாப்பூர், சென்னை

22BSUG12 - HINDI – I

Course Objectives

- To enable the learners to know about the modern trends in Literature
- To imbibe values, social, moral through prose and short stories.
- To introduce the concept of Translation.
- To create an opportunity for the students to learn functional aspects of the language.

Course Outcome

Upon completion the student would be able to,

- Identify the importance a prose
- Translate Hindi to English
- To know about Hindi writers and get moral values from different stories.
- Comprehension will help the students for competitive exams.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

UNIT I

Prose: 1. Meri vasiyath, 2. Kadhamba ke phool, 3. bathcheeth mem shistachar

UNIT II

Non-Detailed: 1. Pareeksha, 2. Takur ka kuwa, 3. Trishanku bechara

UNIT III

Bahuyuktha hindi padnam

UNIT IV

Translation: Hindi to English only (1 – 10 Lessons only).

UNIT V

Comprehension: 15 - 30 Lessons only.

TEXT BOOKS:

1. Govind. M. A., 'Gadhya Manjusha', Amar Prakashan, Mathura, (U.P).
2. Hiranmaya, 'Hindi Gadhya Prabhakar', Siksha Bharathy, New Delhi – 110006.
3. Shankar S K, 'Madhyamic Gadhya sankalan', Lokbharathi Prakashan, Allahabad – 1.
4. Amithab V P, 'Kahani Kunj', Govind Prakashan, Mathura, U. P. – 281 001.
5. Krishnan K, 'Premchand ki shreshtha Kahaniyan', Vani Prakashan, New Delhi – 110002.
6. Prakash S, 'Gadhya Prasang', Sumithra Prakashan, Allahabad - 1
7. Rahamadulla S, Vyavaharic Hindi, Page: 90-91.
8. D.B.H.P. Sabha , 'Anuvad Abhyas – Part III', Chennai - 17.

22BSUG13 - COMMUNICATIVE ENGLISH

Course Objectives:

- To convey message to others clearly
- To develop communication skills
- To enhance students' communicative competence and performance
- To instill language skills

Course Outcomes:

- Expanding the learner's use of maximum functions of English
- Acquiring effective communications both oral and written
- Applying language functions in real situations.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |

| PO | 1 | 2 | 3 | | |
| i. | | | | | |
| ii. | | | | | |
| iii. | | | | | |
| iv. | M | M | M | | |

UNIT I: Functions of English

Use of English in media, business and technology – Social functions: Conversational English Greeting, introducing, requesting, inviting, congratulating, thanking, apologizing, advice, suggestions, opinions, permission, sympathy, asking to repeat, complaining, understanding and being understood, agreement, preference, asking for information, changing the topic.

UNIT II: Oral Communication

Face to face communication – Telephonic conversation: Skills and etiquette – Interview skills – Instruction – Dictation.

UNIT III: Remedial Grammar

Subject verb agreement – Tenses – Transformation of sentence – Auxiliary verbs – Linkers.

UNIT IV: Listening and Reading

Academic listening; Listening to talks and descriptions; Listening to Announcements; Listening to Media news; Listening to casual conversations – Intensive reading, extensive reading, skimming, scanning, literary reading, non-literary reading

UNIT V: Written Communication

Email – letter writing - report writing – note taking – sentence construction (patterns)

TEXT BOOKS:

1. Syamala V, 'Effective English Communication for you', Emerald Publishers, Chennai, 2005. ISBN: 81-7966-002-8.
2. Mohan, Krishna and Banerji M, 'Developing Communication Skills', Macmillan, New Delhi, 2007. ISBN: 978-0333-92919-3.

22BSUG14 - APPLIED PHYSICS AND CHEMISTRY

Course Objectives

- To understand the application of physics and chemistry in Textiles
- To relate various important terminologies and laws with textile application

Course Outcomes

Upon successful completion of the course the student would be able to,

- Discuss various terminologies related to elasticity, viscosity
- Identify the origin of dyes
- Explain the polymerization process

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |
| | 1 | 2 | 3 | | |
| PO | | | | | |
| i. | M | | S | | |
| ii. | M | S | | | |
| iii. | | M | | | |
| iv. | | | | | |

UNIT I

Colour and Chemical Constitution: Colour and constitution - theory of colors. Classification of dyes based on structure, according to application and mode of dyeing. Chemistry of azo dyes, selective examples and its usage in clothing textile.

UNIT II

Chemical analysis of oils and fats: Acid value, saponification and iodine values, viscosity, viscosity index, flash and fire points.

Surfactants: Classification and chemistry of surfactants- application of surfactants in textiles.

UNIT III

Polymers: Introduction – Classification – Types and mechanism of polymerization – Degree of Polymerization. Synthesis of some selective polymers: Polyethylene (LDPE & HDPE), Polyacrylonitrile, Polyesters (PET), Polyamides – Nylon 6 and Nylon 6, 6.

UNIT IV

Elasticity: Modulus of elasticity – Poisson's ratio – Relation between elastic constants and

Poisson's ratio – Torsional pendulum (with and without weights) – Bending of beams – Bending moment – Cantilever loading – Transverse vibrations of cantilever – Non uniform and uniform bending of a beam.

UNIT V

Surface Tension and Viscosity: Molecular interpretation – Surface energy – Molecular force – Shape of liquid meniscus in capillary tube – Angle of contact – Capillary rise and energy consideration. Newton's law – Poiseuille's flow – Stoke's law – Rotation viscometer – Ostwald viscometer. Effect of temperature and pressure on viscosity.

22BSTT15 – APPLIED STATISTICS

Course Objectives

- To enable the students to acquire knowledge in the area of statistics and their applications in business decision making.
- To familiarize the student with functions of several variables.

Course Outcomes

Upon successful completion of this course the student would be able to,

- Diagrammatically represent the data
- Applicate the various statistical tools for explanation

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|--|--|--|

| PO | | | | | |
| i. | | | | | |
| ii. | M | M | | | |
| iii. | | | | | |
| iv. | M | M | | | |

UNIT I

Presentation of data by diagrammatic and graphical method - Formation of frequency distribution. Probability – Concept, Bayes’ theorem. Probability distributions - Binomial, Poisson and normal

UNIT II

Measures of central tendency - Arithmetic mean, median, mode, geometric and harmonic mean, measures of variation and standard deviation and quartile deviations - Skewness and Kurtosis

UNIT III

Simple correlation - Scatter diagram - Karl Pearson’s Co-efficient of correlation – Rank correlation – Regression – Simple and multiple regression analysis - Regression lines

UNIT IV

Sample design – Sampling theory and test of significance – Quality tools – DOE, ANOVA and Chi square test

UNIT V

Analysis of Time Series: Methods of measuring - Trend and seasonal variations – Index number – Unweighted indices - Consumers price and cost of living indices.

Note: Theory and problem shall be distributed at 20% and 80% respectively.

22BSTT16 - TECHNOLOGY OF PRE-SPINNING PROCESS

Course Objectives

- To enable the students to understand the theory of various operations carried out at different stages of pre-spinning processes and the construction of machinery used for preparatory

Course Outcomes

Upon completion of this course, the student shall be able to understand

- Processes involved in the conversion of fibre to yarn
- Functioning of ginning and blow room machinery
- Functioning of carding machines
- Functioning of comber preparatory and comber
- Functioning of draw frame and roving frame

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| PO | | | | | |
| i. | S | | | | |
| ii. | | M | M | M | M |
| iii. | S | | | | |
| iv. | | | | | |

UNIT I INTRODUCTION

Sequence of spinning machinery for producing carded, combed and blended yarns in short staple spinning system; numbering systems for textile materials and conversions; influence of fibre characteristics on yarn spinnability, yarn quality and machine performance

UNIT II GINNING AND BLOWROOM MACHINERY

Description and working of different types of gins; ginning performance on yarn quality; blow room - objectives, principle and description of opening and cleaning, blending machines, scutcher, chute feed, metal detectors, foreign matter detectors; cleaning efficiency, production calculations

UNIT III CARDING MACHINE

Objectives and principle of carding operations; study of carding machine; auto-levelling; card clothing and its maintenance; draft and production calculation

UNIT IV COMBER

Study of comber preparatory machines; objectives and principles of combing; sequence of combing operation; study of combing machine; combing efficiency and production calculation

UNIT V DRAWFRAME AND ROVING FRAME

Draw frame – objectives, construction of machine; drafting systems used in modern draw frames; auto-levelling; draft and production calculation; objectives of roving frame; working of roving frame; bobbin builder mechanism; draft, twist and production calculations; safety measures at pre-spinning processes – equipments used, safety practices.

22BSTT17 - CHARACTERISTICS OF TECHNICAL FIBRES

Course Objectives

To enable the students to understand the

- Structure and morphology of technical fibres
- Physical characteristics of technical fibres

Course Outcomes

Upon completion of this course, the student shall be able to understand the

- Structure and properties of fibres
- Method of investigation of structure of fibres
- Moisture properties of fibres
- Tensile and elongation properties of fibres
- Optical, thermal and frictional characteristics of fibres

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|---|
| | CO | | | | |
| | 1 | 2 | 3 | 4 | 5 |
| PO | | | | | |
| i. | | S | M | M | M |
| ii. | | | | | |
| iii. | S | | | | |
| iv. | | | | | |

UNIT I STRUCTURE OF FIBRES

Classification of fibres; study of morphological structures of fibers; physical properties of fibres; order and disorder in fibre structure; molecular conformations – planar zig-zag, helical, lamellar, and sperulite conformations.

UNIT II STRUCTURE INVESTIGATION TECHNIQUES

Transmission and Scanning electron microscopes-principle; construction and working; X-ray diffraction techniques – estimation of crystallinity; Infrared radiation and dichroism techniques; chemical element and group identification by transmittance and optical density methods, molecular orientation estimation

UNIT III MOISTURE ABSORPTION CHARACTERISTICS

Theories of moisture sorption; moisture absorption behavior of natural and man-made fibres; influence of fibre structure, humidity and temperature on the moisture absorption; conditioning of fibres –mechanism of conditioning and factors influencing conditioning.moisture diffusion

in fibres; heat of sorption – integral and differential, their relation; factors influencing heat of sorption - measurement of heat of sorption

UNIT IV TENSILE AND ELONGATION CHARACTERISTICS OF FIBRES 9

Tensile characteristics –study of strength, elongation, work of rupture, initial modulus, work factor and yield point – determination of yield point. stress-strain relations of natural and manmade fibres - influence of fibre structure, humidity and temperature on tensile characteristics. time effects study of creep phenomena. Elastic recovery and its relation to stress and strain of fibres; mechanical conditioning of fibres and its influence on elastic recovery. load cycling and extension cycling-their effect on elastic recovery. introduction about torsional and flexural rigidity of fibers

UNIT V OPTICAL, FRICTIONAL, AND THERMAL CHARACTERISTICS

Reflexion and lustre-objective and subjective methods of measurement - refractive index and its measurement - birefringence, factors influencing birefringence - absorption and dichroism friction –

static, limiting and kinetic friction, its measurement, comparison of fibres, directional friction in wool

– friction. thermal transitions of fibres - thermal conductivity, thermal expansion and contraction, T_g, melting; static electricity in textile fibres

22BSUG18 – APPLIED PHYSICS AND CHEMISTRY LABORATORY

Course Objectives

- To experiment and define the various laws in physics and chemistry
- To apply and recognize the important laws in physics and chemistry

Course Outcomes

Upon successful completion of the course the student would be able to,

- Analyse the various laws and principles in physics
- Demonstrate various experiments to prove the laws like Young's modulus, Searle's viscometer and newton's rings
- Analyse the various laws and principles in chemistry

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |

| PO | | | | | |
| i. | M | | | | |
| ii. | | M | | | |
| iii. | S | | M | | |
| iv. | | | | | |

LIST OF EXPERIMENTS:

Physics:

1. Young's Modulus – Non-uniform bending – Pin and microscope
2. Surface tension – Capillary rise method
3. Young's Modulus –Uniform bending – Pin and microscope
4. Surface tension and interfacial surface tension – Drop weight method
5. Newton's rings – Radius of curvature of the given lens
6. Viscosity of the liquid by poiseuilles method – viscosity co-efficient
7. Thickness of a wire - Air-wedge method

Chemistry:

1. Qualitative analysis of organic compounds: (Any 5 substances)
Determination of aromatic / aliphatic, saturated / unsaturated, presence of special elements (Nitrogen, Sulphur, Halogens), presence of functional groups of the following

compounds:

- a. Carbohydrates
- b. Phenol
- c. Aniline
- d. Aldehydes
- e. Carboxylic acids
- f. Amine
- g. Ketone

2. Quantitative analysis:

- a) Estimation of Sodium hydroxide,
- b) Estimation of Oxalic acid
- c) Estimation of Hardness.
- d) Estimation of FAS.
- e) Estimation of Chloride.

22BSTT19 – TECHNOLOGY OF PRE-SPINNING LABORATORY

COURSE OBJECTIVES:

To enable the students to learn material passage in the spinning preparatory machines and identify the parts of machine and carryout production, draft and twist calculations.

COURSE OUTCOMES:

Upon completion of this course, the student shall be able to

- Understand the material passage in the spinning preparatory machines and draw gearing diagram
- Identify the components of blow room, carding machine, draw frame, comber and speed frame
- Calculate draft, twist and production rate
- Calculate degree of cleaning in blowroom, card and comber.

LIST OF EXPERIMENTS

Fiber

1. Fiber identification by microscopic analysis
2. Fiber identification by Solubility test
3. Fiber identification by burn test
4. Fiber length analysis by Bare sorter
5. Fiber fineness measurement using micronaire
6. Fiber blend analysis

Yarn

1. Construction details of blow room machines and material passage
2. Cleaning intensity and production calculations in blow room
3. Construction details of carding machine and the material passage
4. Draft and production calculations in carding machine
5. Wire point specifications and settings in carding machine

7. Construction details of drawing machine, material passage, draft and production calculations
2. Construction details of comber and material passage
3. Combing cycle, draft and production calculations
4. Construction details of roving machine, material passage
5. Draft, Twist and production calculations in roving machine
6. Study of builder mechanism of roving machine
7. Determination of degree of openness of fibre at blow room
8. Determination of neps count of card and comber web
9. Determination of actual roller speed, eccentricity of roller and top arm loading

SEMESTER II

22BSUG21- TAMIL – II

குறிக்கோள்கள்:

- மாணவர்களின் மனநலத்துக்கும் வருங்கால வாழ்வுக்கும் உதவும் வகையில் இலக்கியப் பயிற்சி அளித்தல்
- அறம் சார்ந்த வாழ்வியல் விழுமியங்களைக் கற்பித்தல்
- சமயங்களை பற்றி மாணவர்களுக்கு உணர்த்துதல்
- வாழ்வில் கடை பிடிக்க வேண்டிய ஒழுங்குமுறைகளை இலக்கியங்கள் மூலம் கற்றல்
- தமிழர் வீர விளையாட்டுகளை குறுநாவல் வழி கற்றல்

7. சி.சு.செல்லப்பா – காலச்சுவடு பதிப்பகம்

22BSUG22 - HINDI – II

Course Objectives:

- To enable the students to know about the Modern Trends in Literature as the contemporary literature deals with the changing trends in the socio-economic cultural revolution taking place in the social system.
- To introduce the importance of letter writing, dialogue writing and applied grammar in Hindi literature.

Course Outcomes:

- Students can avoid grammatical mistakes.
- To know the letter writing methods, and how to write laghu kathayem by studying the stories.

| PO | | | | | |
| i. | | | | | |
| ii. | | | | | |
| iii. | | | | | |
| iv. | m | m | | | |

UNIT I

1. Sawal, 2. Jeevan ki theen pradhan bathem, 3. Do Chere.

UNIT II

Lagu Kathayem: 1. Fees, 2. Risthe, 3. Kelne ke din, 4. Kamra

UNIT III

Applied Grammar: 1. Line Badaliye, 2. Vachan Badaliye, 3. Vachya Badaliye, 4. Ulte arthavale shabda likiye, 5. Karak cinhom se bariye, 6. Vakyom mem prayog kijiye, 7. Kaal Badaliye, 8. Shudda kijiye.

UNIT IV

Vakya ke liye ek Shabda (one word for one sentence).

UNIT V

Letter Writing: 1. Leave letter, 2. About a tour from the college, 3. About a function celebrated in the college, 4. Applying for the job, 5. Ordering for the books.

TEXT BOOKS:

1. Hiranmay, 'Hindi Gadhya Prabakar', Shiksha Bharathy, Kashmiri Gate, New Delhi - 6
2. Prakashan V, 'Bharathi Gadhya Sangrah', New Delhi.
3. From Laghu Katha.com.
4. Sugam Hindi Vyakaran, Siksha Bharathi Madarsa Road, Kashmiri Gate, New Delhi.
5. Abhinav Pathra Lekhan by D.B.H. Prachar Sabha, Chennai – 17.

22BSUG23 - TECHNICAL ENGLISH - II

Course Objectives:

- To enhance ability and skills of the students to comprehend technical texts
- To develop their speaking skills in paper presentation, discussions etc.
- To acquire proper writing skill for reports, and official communications
- To facilitate them to acquire proper pronunciation skills.

Course outcomes:

- Listening, Reading and Comprehending technical texts, lectures, and talks
- Speaking in formal and informal situation
- Writing reports, Curriculum vitae, Circular, Notice and Minutes
- Acquiring phonetic skills

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|--|

| PO | | | | | |
| i. | | | | | |
| ii. | | | | | |
| iii. | | | | | |
| iv. | m | m | m | m | |

UNIT I: Applied Phonetics

The phonological system in English – speech sounds – stress, rhythm – strong and weak forms – pitch and intonation

UNIT II: Technical Proposals

Definition and key factors – types – contents – format – evaluation

UNIT III: Formal reports

Definition – preparatory steps – types – structure – textile vocabulary

UNIT IV: English for specific purpose

Business communication – competitive examinations (TOEFL etc.) – paper presentations – description and demonstration, advertisement – notices, agenda and minutes

UNIT V: Career skills

Curriculum vitae and cover letters – soft skills – mock interviews – group discussion – personality traits

TEXT BOOKS:

1. Raman M, Sharma, Sangeetha, 'Technical Communication Principles and Practice', Oxford Univeristy Press, New Delhi, 2014
2. Means, Thomas L and Langlois E, 'English & Communication for Colleges', Cengage Learning, USA, 2007

22BSTT24 – MATHEMATICAL DATA ANALYSIS

Course objectives

- To acquaint students with basic concepts related time series, sampling, scaling and data collection techniques.
- To acquaint students to analyses the data using statistical tools.
- To acquire the practical knowledge of analysis of data through EXCEL and SPSS.

Course outcomes

On successful completion of the course, students will be able to:

- Know the practical issues arising in sampling studies.
- Appropriately interpret results of analysis of variance tests
- Design experiments, carry them out, and analyze the data they yield.
- Preparation of project report

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|--|
| | CO | | | | |
| | 1 | 2 | 3 | 4 | |
| PO | | | | | |
| i. | | | | | |
| ii. | | s | s | | |
| iii. | m | | | m | |
| iv. | | | | | |

Unit – I

Concept of time series – Source of time series data – Component of time series – Additive and Multiplicative models – Resolving the components of time series –Trend – Methods of measuring trend

Unit – II

Sampling design – Census and sample survey – Implication of sample design – Sampling procedure – Characteristic – Types – Measurement and Scaling techniques - Measurement of scales – Scaling – Scale classification bases - Scale construction techniques – Methods of data collection – Primary and secondary data - Observation, interview, survey- data classification and tabulation-Case study method

Unit – III

Data Analysis: Hypothesis testing-Introduction, procedure, one tail, two tail tests-Tests involving population mean-Errors in hypothesis testing- Chi square test- One way ANOVA – Non parametric tests- multiple correlation and regression.

Unit – IV

Through EXCEL:

1. Mathematical functions (SUM (), MAX (), MIN (), COUNT (), AVERAGE () combining basic function(MAX,MIN)
2. Illustrate year-wise performance of sales, purchase, profit of company by using chart wizard.
3. Aggregation Functions (SUM IF, COUNT IF)
4. Regression Analysis (FORECAST and TREND)
5. Mini Project – Apply necessary Excel tools to analyse textile database

Through SPSS:

1. Functions of Statistics (Classification, Diagrams and Graphical representation of Data)
2. Descriptive Statistics
3. Calculation of Probabilities under various distributions
4. Correlation & Regression – Partial and Multiple Correlations, Multiple Regression
6. Confidence Intervals for mean, variance, proportions
7. Inferential Statistics for Single through multiple samples. (Chi – Square, t, f and z test)
8. Non – Parametric tests.
9. Experimental Design: One way ANOVA, Two way ANOVA – Factorial designs – Multiple comparison tests
11. Mini Project – Apply necessary tools to analyze textile database

Unit – V

Project report preparation and interpretation- steps in writing report-types of report

NOTE: Class: 50% theory and 50% practical

22BSTT25 - YARN SPINNING FOR TECHNICAL TEXTILES

Course Objective:

To enable the students to understand the

- Theory of yarn formation by different spinning systems
- Construction of yarn spinning machines
- and to practice the students to prepare yarn using ring and rotor spinning machine.

Course Outcome:

Upon completion of this course, the student shall be able to

- Understand the theory of formation of yarn by ring spinning system and construction of machine
- Understand the features and elements of ring spinning machine and its automation, principle of compact spinning system,
- Understand the working of rotor spinning and design features of important elements
- Understand the working principle of friction, air vortex, air jet and other spinning system
- Understand the concept and production of ply yarns and fancy yarns

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|---|
| | CO | | | | |
| | 1 | 2 | 3 | 4 | 5 |
| PO | | | | | |
| i. | | | | | m |
| ii. | | m | m | m | |
| iii. | s | | | | |
| iv. | | | | | |

UNIT I RING SPINNING - I

Principle of yarn formation in ring frame-drafting, twisting and winding; mechanism of cop building, top arm loading; draft, twist and production calculations

UNIT II RING SPINNING – II

Design features of important machine elements of ring frame – ring, traveller, spindle, drive arrangement; end breakage rate – causes and remedies; automations; condensed yarn spinning – principle, different methods, properties; comparison with ring spun yarn

UNIT III ROTOR SPINNING

Principle of open end spinning; principle of yarn production by rotor spinning system; design features of important elements used in rotor spinning; techno economic study of rotor spinning

UNIT IV OTHER SPINNING SYSTEMS

Friction, air vortex and air-jet spinning systems – principle of yarn production, raw material used, structure, properties and applications; principle of yarn production by self-twist, core, wrap, adhesive, electrostatic, disc spinning systems

UNIT V PLYING AND FANCY YARN SPINNING

Merits of plying of yarns; methods followed for plying – TFO, ring twisting; selection of twist level for plying; calculation of resultant count of plied yarns; fancy yarns- types, method of production; safety measures at spinning machines – equipments used, safety practices

22BSTT26 - TECHNOLOGY OF PRE-WEAVING PROCESS

OBJECTIVE:

- To enable the students to understand the theory of preparation of yarn for fabric formation and functioning of various preparatory machines

OUTCOMES:

Upon completion of this course, the student shall know about

- Objectives of working principle of winding machines
- The machine and process parameters in winding
- Objectives and working of warping and sizing machines
- The process control in warping and sizing
- Drawing – in and denting process

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|---|
| | CO | | | | |

| PO | | | | | |
| i. | | | | | m |
| ii. | | m | m | m | |
| iii. | s | | | | |
| iv. | | | | | |

UNIT I WINDING MACHINE

Objectives of winding; principles and study of precision and drum winding machines; uniform build of yarn package; types of drums – half accelerated and fully accelerated drums; weft winding; winding for colouration; sewing thread winding; production calculations

UNIT II PROCESS CONTROL IN WINDING

Classification of yarn faults and its removal; concepts in yarn clearing – mechanical, optical and electronic clearers; package defects - causes and remedies; winding synthetic and blended yarns; winding performance and maintenance; material handling; knotters and splicers - quality of knots and splices

UNIT III WARPING AND SIZING MACHINES

Objectives of warping, material flow in beam warping and creels used in warping machines; sectional warping machines; objectives of sizing, sizing materials and recipe used for different types of fibres, size preparation; study of sizing machine; concept of single end sizing, combined dyeing and sizing; production calculations.

UNIT IV PROCESS CONTROL IN WARPING AND SIZING

Warping defects – causes and remedies, sizing defects – causes and remedies; control of yarn breaks, hard waste in warping; sizing of filament yarns; control systems used in sizing machine; size pickup control

UNIT V DRAWING-IN

Need for drawing-in operation; manual and automatic drawing-in, denting, leasing; knotting machines; selection and care of reeds, heald wires and drop pins, control of cross ends and extra ends and calculations; safety measures at pre-weaving processes -equipment's used, safety practices.

22BSTT27 - TECHNOLOGY OF MANUFACTURED FIBRE PRODUCTION

OBJECTIVES:

To make the students understand different methods of production of manmade fibres and post spinning operations

OUTCOMES:

Upon completion of the course, the student shall know about the

- Synthesis of polymers
- Melt spinning of polymers
- Solution spinning of polymers
- Drawing and spin finish of fibres and filaments
- Heat setting and texturing process

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| iii. | s | | | | |
| iv. | | | | | |

UNIT I POLYMER PREPARATION

Monomer used for polymer preparation, methods of polymerization of different fibers; polymer rheology-Newtonian and non-Newtonian fluids.

UNIT II MELT SPINNING

Melt Spinning- polymer selection and preparation, equipments, testing of filament, properties and applications of polyester, polyamide and polypropylene fibres; process control

UNIT III SOLUTION SPINNING

Solution spinning- polymer selection and preparation, equipments, testing of filament, properties and applications of acrylic, polyurethane and regenerated cellulose fibres; process control

UNIT IV DRAWING AND SPIN FINISH

Neck drawing, drawing systems, influence of drawing on structure and properties of various fibres; spin finish – requirements, compositions and methods of application;

UNIT V HEAT SETTING AND TEXTURING

Types of heat setting, influencing parameters on heat setting, influence of heat setting on various fibre properties; texturizing – principles and methods

22BSTT28 – TECHNOLOGY OF PRE-WEAVING LABORATORY

Course Objective:

- To enable the students to practically understand the mechanisms of loom

Course Outcome:

Upon completion of this practical course, the students will be able to

- Test and analyze the yarn faults
- Control the weaving mechanism in consideration with fabric quality and loom performance
- Produce the woven fabric samples in power loom.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

List of Experiments

1. Measurement and analysis of yarn faults
2. Determination of package density of cones
3. Soft winding for yarn dyeing
4. Creel warping
5. Sectional warping
6. Size paste preparation
7. Size paste application
8. Drafting and Looming-in of warp sheets

22BSTT29 – YARN SPINNING LABORATORY - II

COURSE OBJECTIVES:

To enable the students to learn material passage in the spinning preparatory machines and identify the parts of machine and carryout production, draft and twist calculations.

COURSE OUTCOMES:

Upon completion of this course, the student shall be able to

- Understand the material passage in the spinning machines
- Identify the components of various spinning techniques
- Calculate draft, twist and production rate

22BSUG20 – YOGA FOR HUMAN EXCELLENCE[#]

Course Objectives

- To know about the importance of Physical Exercises, yogasana and meditation
- To empower the students with knowledge about the mind and its functions

Course outcomes

Upon successful completion of this subject, the students should be able to:

- Develop good physical and mental strength
- Live a stress free and balanced lifestyle

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|--|--|--|
| | CO | | | | |

| iii. | | | | | |
| iv. | m | s | | | |

UNIT I: Yoga Types

Types of yoga – karma yoga – bhakthi yoga – raja yoga – gnana yoga – hata yoga. agna- santhi – clearence – thuriya – thuriyatheetham.

UNIT II: Yogasana, Varma Art and Naturopathy

Padmasana, halasana, vajrasana, sukasana, chakrasana (side posture), viruchasana, bhujangasana, yoga mudra, ustrasana, maha mudra, vakkarasana. art of varma – philosophy of varma – practices – benefits – methods of naturopathy.

UNIT III: Simplified Physical Exercises

Physical exercises – hand exercises – leg exercises – breathing exercises – eye exercises – kapalabathi – makarasana – body massage – acupressure – relaxation science and total consciousness – integrated approach.

UNIT IV: Personality Development

Introspection – analysis of thoughts – moralization of desire – neutralization of anger – eradication of worries – benefits of blessing.

UNIT V: Life lessons

Divine thoughts of Bharathiar – Concepts of Ramalinga Vallalar Vethathirian principles – Practical solutions of Vethathirian philosophy.

TEXT BOOK:

1. “Simplified Physical Exercises”, Vedhathiri Maharishi Pathipagam, 180, Gadhiji Road, Erode – 638001.

SEMESTER III

22BSTT31 – TECHNICAL FABRIC MANUFACTURING

Course Objective

To enable the students to learn the

- Basics of weaving machine and important motions of looms
- Selection and control of process variables during fabric formation

Course Outcomes

Upon completion of this course, the student shall be able to understand the

- Basics of weaving operation and tappet shedding
- Working of dobby and Jacquard shedding mechanism
- Principle of weft insertion in shuttle and shuttleless weaving
- Beatup, secondary and auxiliary motions
- Control of process variables at loom and understand the principle of producing special fabrics

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|---|
| | CO | | | | |
| | 1 | 2 | 3 | 4 | 5 |
| PO | | | | | |
| i. | S | | | | S |
| ii. | | M | M | M | M |
| iii. | S | M | M | M | |
| iv. | | | | | |

UNIT I INTRODUCTION TO WEAVING AND TAPPET SHEDDING

Yarn quality requirements for different looms; principle of weaving - primary, secondary and auxiliary motions; loom timing; shed geometry and shedding requirement; types of shed; tappet shedding - positive and negative; shedding by link mechanism, reversing mechanisms; kinetics of heald shaft

UNIT II DOBBY AND JACQUARD SHEDDING

Dobby and jacquard shedding mechanisms- type, drive arrangement and principle of working; electronic dobby and jacquards; pattern card preparation; harness tie-up used in jacquards

UNIT III WEFT INSERTION

Shuttle – construction, types; shuttle picking and checking mechanisms, shuttle flight timing; mechanism of weft insertions in shuttleless looms - projectile, rapier, air-jet and water-jet; multiphase weaving systems

UNIT IV BEAT UP, SECONDARY AND AUXILIARY MOTIONS

Kinematics of sley, sley eccentricity; beat up mechanism in modern looms; take up and let-off motions; warp protector and, warp and weft stop motion; automatic weft replenishment in shuttle looms – pirn changing and shuttle changing mechanism; multi shuttle looms- box changing principle; weft accumulators in shuttleless looms; selvages – types, formation techniques

UNIT V PROCESS CONTROL & SPECIAL WEAVING PROCESS

Techno economics of shuttleless loom; loom monitoring and control, loom stoppages and efficiency; fabric defect - analysis and grading, causes and remedies; filament weaving – silk & texturized yarns; principles and mechanisms in weaving - pile fabrics, tapes, tri-axial and 3D fabrics; loom production calculation; safety measures to be taken at weaving industry..

22BSTT32 – MODERN KNITTING TECHNOLOGY

Course Objectives

To enable the students to learn about

- Fundamentals of knitting
- Types of knitting processes in detail
- Functioning of different components of knitting machine

Course Outcomes

Upon completion of this course, the student shall know the

- Type of knitting processes, yarn requirements for knitting
- Principle of knitting in different types of knitting machines
- Basic weft knitted structures, flat knitting process
- Functioning of weft knitting machines
- Functioning of warp knitting machines

UNIT I INTRODUCTION

Reasons for the growth of the knitting industry; comparison of fabric properties - woven, knits and bonded fabrics; classification of knitting processes – weft knit & warp knit; yarn quality requirements for knitting; preparation of staple yarns for weft and warp knitting. General definitions and principles of knitting; types of knitting needles – Bearded, Latch & Compound needle; elements of knitted loop structure

UNIT II WEFT KNITTING

Basic weft knitted structures and their production - plain, rib, interlock and purl; fundamentals of formation of knit, tuck and float stitches; factors affecting the formation of loop; effect of loop length and shape on fabric properties; analysis of various types of weft knitted structures; weft knitted fabric geometry; basic principles and elements of flat knitting machines; different types of flat knitting machines- manual, mechanical and computer controlled; production of various weft knitted structures using flat knitting machines;

UNIT III WEFT KNITTING MACHINE

Construction, characteristics and working of circular knitting machines used for the production of basic structures; production of derivatives of weft knitted structures; needle control in circular knitting machines; quality control in knitted fabric production; production calculation; safety measures to be taken at knitting industry; process control in weft knitting

UNIT IV WARP KNITTING

Basic principles; elements of warp knitted loop – open loop, closed loop; warp knitting elements chain link, chain links for simple patterns, guide bar movement mechanism; Tricot and Rachel warp knitting machines; principles of double needle bar patterning, terry pile fabric production; let off system; run in value based on the lapping diagram; take up system; theoretical concepts of warp knitted loop configuration

UNIT V WARP KNITTING

Uses of warp knitted fabrics in technical applications

22BSTT33 – TECHNOLOGY OF NON WOVENS AND BONDED FABRICS

Course Objectives

- To understand the fundamentals of various production processes in the manufacture of nonwovens
- To acquire knowledge on the different methods of finishing nonwoven products
- To understand the various applications of nonwovens

Course Outcomes (COs)

1. Explain the nonwoven manufacturing processes using natural and chemical fibres
2. Differentiate different bonding methods used in nonwoven manufacturing process
3. Suggest suitable finishing methods of nonwoven meant for different applications.
4. Evaluate the nonwovens in terms of physical properties
5. Outline the applications of nonwovens for hygiene and household products.

| iii. | M | | | | M |
| iv. | | | | | |

UNIT I WEB FORMATION

Definition of Nonwoven - nonwoven manufacturing processes - nonwoven properties and applications including environmental considerations. Raw materials for the production of nonwoven: natural fibers -animal fibres -chemical fibres. Web forming - Lay process - spun laying. Spun bonding web Formation.

UNIT II BONDING

Needling: principle - needle characteristics - process variables- fabric properties. Loop formation

processes: types - Process variables -fabric properties. Hydro-entanglement process: principle -process variables -Fabric properties. Bonding: Hot air - Heat setting - Thermal calendar-ultrasound - Chemical - saturation - print. Foam and spray bonding.

UNIT III FINISHING

Mechanical finishing: splitting and winding - perforating -drying - compressive finishes, Surface finishes: singeing - shearing - flocking - raising - polishing -softening, Wet finishes: washing -colouration -printing - Application of chemical finishes: types - antistatic agents - antimicrobial or biocidal finishes -flameproof finishes - waterproof finishes - softeners-stiffeners. UV stabilisers.

UNIT IV TESTING

Sampling and statistics - Testing conditions -Standards and specifications. Testing of raw materials - finished fabrics. Testing process related to end use: hygiene and medical products – household textiles. Protective clothing and filter fabrics.

UNIT V APPLICATIONS

Hygiene - medical-safety -cleaning - household products - home textiles - apparels - technical. Reutilization of nonwovens - recycling of nonwovens. Techno economic in nonwovens.

22BSTT34 - TECHNICAL TEXTILES – I

COURSE OBJECTIVES

- To inculcate the knowledge of textile materials in various technical areas.
- To learn about technical textiles, and its applications in different field knowledge.

COURSE OUTCOMES

Upon successful completion of this course the student would be able to,

- Identify the various technical textiles used in the day to day life
- Visualize the usage of various fibres for specific application

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| | | | | | |
| PO | 1 | 2 | | | |
| i. | M | M | | | |
| ii. | M | S | | | |
| iii. | S | | | | |
| iv. | | | | | |

UNIT I

Technical Textiles: Definition – Classification – Market growth and potential - Future of Technical Textiles industry in India. Fibres used - Technical yarns: staple yarns, monofilament, multifilament yarns - Technical fabrics: woven, nonwoven, knitted. Technology of Specialty fabrics manufacturing: braided structures, Spacer fabrics, 3-D weaving. Application of Specialty fabrics

UNIT II

Coated Textile – Textile and Coating materials: Textile materials and fibers, their properties, woven, knitted, non-woven materials. Polymeric materials for coating and their properties like rubber (natural and synthetic), polyvinyl chloride, polyurethane, acrylic polymers. Applications of coated materials.

UNIT III

Textiles for filtration: Introduction, importance of filtration, Principles and mechanism of Filtration, requirements of filtration, Filtration Equipments, Textile in Dry Filtration, Textile in

Liquid Filtration, Designing for Filtration, Testing and evaluation of performance. Application and developments in filtration fabrics.

UNIT IV

Textiles in Agriculture, Electronics. Textiles for Banners and Flags. Textile Reinforced Products, Transport Bags and Sheets, Pack-tech related applications, Fabrics to Control Oil Spills, Canvas Covers and Tarpaulins, Ropes and Nets, Home and Office Furnishings, Testing and evaluation techniques of all these products

UNIT V

Smart and Intelligent Textiles: Active, passive and very smart textiles - Phase change materials - shape memory polymers - chromic and conductive Materials - applications in various fields.

22BSTT36 – NON-WOVEN AND BONDED FABRICS LABORATORY

Course Objectives

- Interpret the property of the technical fabrics and requirements of the product in the area of application
- Design the process to impart the necessary performance on the textile substrate
- Perform function assessment testing on the imparted performance and access the level of performance.

Course Outcomes (COs)

1. Select appropriate fabrics for any certain application
2. Select necessary chemical for imparting performance on the fabric
3. Access and analyze the performance of the finished fabric and improvise the performance as per requirement

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

List of Experiments:

1. Preparatory line for Nonwoven manufacturing
2. Needle punching
3. Hydroentanglement
4. Thermal bonding
5. Ultrasonic bonding
6. Chemical bonding
7. Narrow fabric manufacturing
8. Anti-Static finishing
9. Insect repellent finishing
10. UV protection finishing

22BSTT37 – MODERN KNITTING LABORATORY

Course Objectives

- To study the various knitting machines and differentiate them.
- To develop a knitted fabric based on their application

Course Outcomes

Upon successful completion of this course the student would be able to,

- Experiment with the various machine parameters for creating a fabric for a specified end use Identify the given knitted fabric

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

22BSTT38 – TECHNICAL FABRIC MANUFACTURING LABORATORY

Course Objectives

- To study the operating mechanism of the weaving machine
- To study the woven fabric structures and its derivatives.

Course Outcomes

Upon successful completion of this course the student would be able to,

- Understand the yarn passage in weaving machine
- Design the weave patterns
- Identify design draft and peg plan

22BSTT39 – INTERNSHIP – I

Course Objectives

- To expose the students in the real time world
- To gain knowledge on the process, machinery and technology

Course Outcomes

After successful completion of this course, the students should be able to

- Identify the solution for industry related problems
- Understand the suitable process, machinery and technology for product manufacturing
- Summarize the results and submit a report.

Pre-requisites:

Students will undergo internship training in an established organization of Textile for a period of 3 weeks.

- At the end of internship training, students will submit a report of training undertaken.
- The student has to present their report to the Panel of members for evaluation.

SEMESTER IV

22BSTT41 - TEXTILE CHEMICAL PROCESSING

Course Objectives

- To understand the preparation of fibre, yarn and fabric for dyeing and machinery required.
- To understand the concept of colouration and processes involved in the colouration of textile materials.
- To understand printing and finishing of textile materials.
- To analyze the design, constructional and operational features of textile Printing and finishing machinery.

Course Outcomes (COs)

1. Suggest process, process parameters and methods different textile material
2. Develop recipe, choose dyes and evaluate fastness properties
3. Select methods, styles of printing and printing ingredients to carry out printing of textile materials
4. Appraise an effluent treatment plant.

UNIT I PREPARATORY IN WET PROCESSING

Wet process sequences for cotton (knitted & woven), wool, silk and blended fabrics. Singeing: Desizing: Scouring: Saponification - emulsification - detergency - Scouring of cotton. Wool: scouring, Crabbing, Milling and carbonization - Silk: Degumming. Scouring of synthetic materials and blends. Features and working principles of - kier. Physical and chemical methods of assessing scoured fabrics - Measurement of residual impurities.

UNIT II BLEACHING AND MERCERIZING

Bleaching: Reactions of hypochlorite - hydrogen peroxide - sodium chlorite. Continuous scouring and bleaching process. Combined scouring and Bleaching. Bleaching of blends - Physical and chemical evaluation of bleached materials. Mercerization: Principles and methods - effects of process conditions on structure and properties. Mercerization of cotton / viscose blends. Mercerizing machines - Assessment of mercerized samples. Liquid ammonia treatment.

UNIT III DYEING

Dyes - properties - Auxochrome, chromophore and common dye structure - dye-fibre interactions -Substantivity - Affinity - Adsorption - Mechanism and Application: Direct, Reactive, Acid, Basic, Vat, Disperse, Sulphur, Azoic and Metal complex dyes. Dyeing of PET, Nylon, Acrylic, cellulose, Triacetate and protein fibres. Dyeing of blends.

Wet Processing Machines: Construction (schematic diagram) and working of loose stock, hank and package processing machines - J-box - jigger - winch - jet and soft-over-flow machines - continuous dyeing ranges.

UNIT IV PRINTING METHODS

Hand, block, screen, roller, rotary, inkjet, digital, Transfer, garment printing. Drawback and advantages. Photoelectric method of screen preparation. Styles of Printing: Direct, Discharge and Resist Styles. Printing Ingredients: Printing paste- properties and requirements. After Treatment: Steamers - Agers - Curing process. Printing of Cellulose Fabrics: Direct, Reactive, Vat, Azoic and Sulphur Dyes and Pigments Printing of Wool/Silk Fabrics: Acid, Basic and Reactive Dyes. Printing of Synthetics: Disperse Dyes, Acid Dyes and Pigments

UNIT V EFFLUENT TREATMENT

Suitable solutions for sustainable wet processing, Textile Effluent: Characteristics, BOD, COD, TDS and pH. Textile Effluent Treatment: Primary, Secondary Tertiary Membrane technology. Zero Discharge. Effluent (discharge) and environment compliance: BIS and other international standards like ISO, DIN.

22BSTT42 – TECHNICAL FABRIC STRUCTURE

Course Objective

To enable the students to learn the

- About different structures of woven fabric and design the structure for different applications

Course Outcomes

Upon the completion of this course the student will be able to construct design, draft and peg plan and loom requirements for producing fabrics with

- Plain, twill, satin and derivatives structures
- Honey comb, crepe structures
- Bedford cords, piques, backed fabrics, extra warp/weft figuring
- Warp and weft pile structures
- Double, damask, gauze and leno structures

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| iii. | S | S | S | S | S |
| iv. | | | | | |

UNIT I

Introduction – methods of representing weave in point paper, construction of design, draft and lifting plan, types of draft, heald calculation, order of denting; elementary weaves – plain, twill, satin, sateen and their derivatives – loom requirements

UNIT II

Ordinary and brighten honey comb; huck-a-back and its modifications; mock Leno; crepe weaves; colour theory – light and pigment theory; modification of colour; colour and weave effects; loom requirements

UNIT III

Bedford cords - plain and twill faced, wadded; welts and piques, wadded piques; backed fabrics warp and weft, reversible and non-reversible fabrics; extra warp and extra weft figuring – single and double colour – loom requirements

UNIT IV

Pile fabrics; warp pile - wire pile, terry pile, loose backed; weft pile – plain back and twill back velveteen, lashed pile, corduroy, and weft plush – loom requirements, Double cloth, types of stitches; Damasks; Gauze and Leno principles – loom requirements; trade name of popular structures

UNIT V

Weft knit Stitches: Knit, purl, tuck, and float. Weft knit structures and derivatives: Single jersey, rib, interlock, la coste, cross tuck, satin, knit twill, honeycomb, popcorn, jersey blister, French terry, thick fleece, ribbed effect, and seer sucker, plush.

Warp knit Stitches: Overlap, under lap, open stitch, closed stitch. Warp knit structures and derivatives: pillar, inlay, blind, atlas, twill, and full tricot, lock knit, satin, reverse lock knit, shark skin, queen's cord.

Unit 1

Medical Textiles- products, properties and fiber used: Non-implantable materials, extra-corporeal devices, implantable materials, healthcare and hygiene products. Fibres used in medical textiles.

Unit 2

Industrial Textile: Fibres used - functions and properties - introduction to coated fabrics - Coating methods: Direct and indirect - Lamination methods: Flame bonding and adhesive lamination - Applications of coating and laminated textiles

Unit 3

Textiles for Construction: Importance of buildtech with respect to technical textiles, Requirements of buildtech, study of structure and properties of high performance textile structures in relation to requirements of buildtech. Applications like Fabrics for Architecture and Construction, Applications of Coated Fabrics in Building Structures, Awnings and Canopies, Textiles as Roofing Materials, Storage Vessels, Fibre Reinforced Concrete and Cements, Textiles for Acoustic and heat Insulation

Unit 4

Textiles in transportation: Introduction - Raw material selection – properties – classification - applications - Manufacturing process - structure and properties: Tyre cord fabrics, Airbags, Seat Belts, Automotive Interior Trim, Automotive Exterior Trim, Truck and Car Covers, Hoses and Filters in Cars. Textile for Aircrafts, Textiles as structural Elements in Transport Vehicles, Inflatable Products Used in Transportation. Testing and evaluation techniques of above products.

Unit 5

Protective Textiles: Materials used – properties – Manufacturing techniques - applications: Fire Protective clothing, Heat resistant garments, Water proof materials, Ballistic resistant Vests, Biological and chemical Protective clothing.

22BSTT44 - GARMENT MANUFACTURING TECHNOLOGY

Course Objectives

- To upgrade the knowledge in the field of garment design & development
- To study the various stages involved in the production of garments

Course Outcomes

Upon successful completion of this course the student would be able to,

- Identify the various types of sewing machine
- Differentiate the various stages of garment production

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

Unit – 1: Apparel Industry: Introduction, Organization and Overview. Anthropometric measurements: vertical, horizontal and circumference. Pattern making tools & equipments. Grain lines: study of grain lines in fabrics and patterns, Types: lengthwise, widthwise, bias and selvages.

Unit – 2: Spreading: Types of lay - single ply, multiply, stepped ply - Forms of Spreading: One way, face to face, two way - Spreading methods: manual spreading, Spreading carriage, automatic spreading machine. Layout: Principles, laying of different patterns on different types of fabric. Grading – Definition, principles, types and Importance.

Unit – 3: Marker making: Types of marker making, types of lay plan, marker efficiency, Position marking, drill marker, notches, thread marker, Fusing machines & their applications.

Unit – 4: Sewing machine: Types – Manual, Semi-automatic and Automatic - function and major components – application - care and maintenance. Stitches: Introduction, types, diagrams and steps of stitch formation. Sewing machine needles: Types – straight and curved - needle points - size - uses.

Unit- 5: Operation and application: over-lock, flat-lock, double needle lock stitch, double needle chain stitch, button hole, button attach, bar-tack, zig-zag, feed off the arm sewing machines

22BSTT46 - ENVIRONMENTAL STUDIES

Course Objectives

- To enable the students to understand the different types of pollution and its impact on environment
- To create awareness among the students about eco-systems, social issues and environmental pollution control legislations

Course Outcomes

Upon successful completion of this course the student would be able to,

- Elaborate on the various natural resources
- Identify the various forms of pollution
- Know various social issues

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|---|---|---|--|--|

| PO | 1 | 2 | 3 | | |
| i. | | | S | | |
| ii. | | M | | | |
| iii. | S | | | | |
| iv. | | M | | | |

UNIT I

Natural Resources: Renewable and non-renewable resources - natural resources and associated problems - forest resources - water resources - mineral resources - food resources - energy resources - land resources - role of an individual in conservation of natural resources - equitable use of resources for sustainable lifestyles.

UNIT II

Ecosystems: Concept of ecosystem - structure and function of an ecosystem – producers, consumers and decomposers - energy flow in the ecosystem - ecological succession - food chains, food webs and ecological pyramids.

UNIT III

Environmental Pollution: Meaning and factors, types of environment pollution: air pollution, water pollution, noise pollution, industrial pollution - soil pollution - marine pollution - thermal pollution - nuclear hazards - role of an individual in prevention of pollution.

UNIT IV

Social issues: from unsustainable to sustainable development - urban problems related to energy - water conservation, rain water harvesting, watershed management - resettlement and rehabilitation of people; its problems and concerns - environmental ethics : issues and possible solutions - climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust.

UNIT V

Environment Protection act: Environment protection act - air (prevention and control of pollution) act - water (prevention and control of pollution) act - wildlife protection act - forest conservation act - issues involved in enforcement of environmental legislation - public awareness.

22BSTT47 - TECHNICAL FABRIC STRUCTURE ANALYSIS LABORATORY

Course Objectives

- To study the operating mechanism of the weaving machine
- To study the woven fabric structures and its derivatives.

Course Outcomes

Upon successful completion of this subject, the students should be able to:

- Understand the yarn passage in weaving machine
- Design the weave patterns
- Identify design draft and peg plan

LIST OF EXPERIMENTS

1. Study of material passage in loom
2. Study the passage of material in braiding machine
3. Analysis of woven designs: Plain and its derivatives
4. Analysis of woven designs: Twill and its derivatives
5. Analysis of woven designs: Satin / Sateen
6. Analysis of huck-a-back / honeycomb weaves
7. Analysis of mock-leno / crepe weaves
8. Analysis of extra warp / extra weft figurine
9. Analysis of double fabric
10. Analysis of Pile fabric

22BSTT48 - TEXTILE CHEMICAL PROCESSING LABORATORY

Course Objectives

- To acquire the skills in preparation for textile materials. To evaluate the properties of pretreated materials and the strength of chemicals used in the pre-treatment.

Course Outcomes (COs)

- Select process parameters for desizing, scouring and carry out in laboratory scale
- Choose process parameters and carry out bleaching and mercerization of given samples
- Develop dye recipes and new print patterns

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |

| iii. | m | m | m | | |
| iv. | | | | | |

List of Experiments:

1. Hydrolytic desizing, scouring of grey cotton and assessment of the desized and scoured samples.
2. Comparison of hydrogen peroxide and sodium hypochlorite bleached samples for whiteness
3. Comparison of dyed properties on cotton with direct dye and reactive dye (hot and cold brand dye)
4. Dyeing of wool/silk with acid and basic dyes
5. Dyeing of polyester with disperse dyes (HTHP)
6. Direct style of printing on cotton fabric using direct dyes and reactive dyes.
7. Printing of white and colour khadi paste/Pigment.
8. Tie and Dye
9. White and colour discharge print on reactive dyed cotton fabric
10. Printing of blended fabrics using direct, pigment and burnout methods

22BSTT49 - GARMENT MANUFACTURING LABORATORY

Course Objectives

- Prepare samples for various types of stitches.
- Prepare samples for fullness, plackets, zippers, collars, pockets, sleeves and yokes.

Course Outcomes

Upon successful completion of this course the student would be able to,

- Identify and explain the parts and functions of a sewing machine.
- Prepare various samples for stitching.
- Categorize various attachments for enhancing the garment value.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| iii. | M | M | | | |
| iv. | | | | | |

LIST OF EXPERIMENTS:

1. Study on parts and functions of sewing machine, overlock machine, Flat lock machine
2. Measuring the form – Male, female and child.
3. Drafting the basic pattern set of bodice and sleeve using the standard measurements.
4. Drafting the basic pattern of skirt and trouser using the standard measurements.
5. Prepare samples for seams and seam finishes
 - A) **Seams:** plain, single top stitch, double top stitch, welt, lapped, slot, flat fell, french, hemmed flat fell, mantua maker's and piped seam.
 - B) **Seam Finishes:** pinked, double stitch, edge stitch, herring bone, bound seam edge finish and overcast finish.
6. Preparation of samples for **Fullness** (darts, tucks, pleats, flares, godets, gathers and shirrs, frills and ruffles).
7. Prepare samples of collars – Peter Pan collar, shirt collar and stand collar
8. Prepare samples of pockets – Patch, set in seam and set in slot
9. Prepare samples of sleeves – Plain, puff, raglan and kimono
10. Prepare samples of yokes – Partial yoke, yoke with fullness

SEMESTER V

22BSTT51 - HIGH PERFORMANCE FIBRES

Objectives & Outcome:

- To provide the knowledge about modern functional fibre and its commercial application
- To provide the knowledge about the characteristics and production methods of high performance fibers.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|--|--|--|
| | CO | | | | |
| | 1 | 2 | | | |
| PO | | | | | |
| i. | S | S | | | |
| ii. | S | M | | | |
| iii. | M | M | | | |
| iv. | | | | | |

UNIT - 1

Introduction to high performance fibre – growth patterns – major attributes- advantages- product development areas; Aramids- fibre formation – structure-properties- performance – applications

UNIT - 2

Carbon fibre – introduction – classification – types- manufacturing process – PAN – rayon – Mesophase Pitch – structure – properties- application – new developments; Glass fibres – introduction – fibre types – compositions- manufacturing process – fibre structure- properties- application and new developments

UNIT - 3

Polyethylene fibres – introduction – fibre formation – structure –properties-applications and new developments; Ceramic fibres –classification – fibre formation – composite – structure - properties-applications and new developments

UNIT - 4

Chemically resistant fibres –introduction – chlorinated fibres –PVDC- Fluorinated fibres – PTFE –PVF –PVDF – FEP: Thermally resistant fibres –Introduction – thermosets –aromatic polyamides and polyamides – semi-carbon fibres – oxidized acrylics.

UNIT - 5

Other fibres – Introduction- PBZT and PBO – Quartz – Copolymer Polyester Vectra-Vectran – Poly(p-xylylene) – miscellaneous.

22BSTT52 – FUNCTIONAL FINISHING OF TEXTILE MATERIAL

Course Objectives

- To understand the advancements in the finishing process of textile materials.
- To evaluate the alternative processes in preparation and finishing
- To acquire knowledge on the science and technology of coating and lamination of textile materials.
- To understand the applications of coated and laminated textiles.

Course Outcomes (COs)

1. Suggest recipes for textile materials for different finishing and employing latest developments.
2. Evaluate the concepts involved in textile finishes.
3. Appraise textile fibres, structures and parameters for coating applications.
4. Select appropriate polymers, resins and suitable methods and machines for coating applications.
5. Characterize coated and laminated textile materials.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|---|
| | CO | | | | |

| PO | | | | | |
| i. | | S | | | |
| ii. | S | | M | | S |
| iii. | M | M | | M | M |
| iv. | | | | | |

UNIT I FINISHING

Mechanical and Chemical Finishing - Durable and non-durable finishes - Heat setting (stenter) - Calendaring - Sanforising. Application of chemical finishes: padding- low wet pick up methods (foaming, spraying) - coating and laminating. Drying (cylinder, loop, tumble).

UNIT II FUNCTIONAL FINISHES

Flame retardant finish: Mechanism - Assessment methods of FR finish. Water repellent and water proof finishes: Wetting- Contact angle - assessment methods. Soil release finish: mechanism - Evaluation of soil release. Wash and wear finish: mechanism - cross linking agents (formaldehyde and non-formaldehyde)- assessment methods. Mechanism and

chemistry: Antistatic finish - UV Protection finish -Antimicrobial finish - Anti odour finish - enzymatic treatment (bio-polishing).

UNIT III ADVANCED FINISHES

Micro and Nano encapsulation and its application in finishing of textile materials - Finishing of Technical textiles - Formaldehyde-free crease recovery finishing. Problems and remedies in the flame retardant finishing of polyester and its blends. Bio-polishing - Influence of bio-polishing on dyeability and physical properties of fibres and fabrics - developments of new fibres using Bio technology.

UNIT IV COATING AND LAMINATION MATERIALS & METHODS

Commercial and technical scope of coated and laminated textiles. Materials for coating: Plastic materials -natural and synthetic rubbers, Polyvinyl Chloride, Acrylic polymers. Materials for lamination: Films - polyurethane foam -polyolefin foam.

Adhesives: solvent-based and water-based. Textile Substrate: Requirements of textile substrates for coating, Selection of textile fibres and fabric structure.

Coating and Lamination Methods: Calendaring coating - Knife coating - Roller coating - Nip and Dip coating - Spray coating - Foam coating - Powder coating-Slot die extruder-Flame lamination – Hot melt lamination.

UNIT V PRODUCTS

Protective Clothing - the spacesuit - garment interlinings - Tarpaulins - Conveyor belts - PTFE coated belts - Hot air balloons - Exhibition board coverings - Labels -Tyres and hoses - applications: Automotive - Marine - Buildings and architecture -Household products.

Adhesion test -Flexing Test -Abrasion resistance - Fabric handle, drape and stiffness - Fabric strength - Bursting strength - Dimensional stability - Thermal comfort -Flammability testing.

22BSTT53 - TECHNICAL TEXTILES – III**COURSE OBJECTIVES**

- To inculcate the knowledge of textile materials in various technical areas.
- To learn about technical textiles, and its applications in different field knowledge.

COURSE OUTCOMES

Upon successful completion of this course the student would be able to,

- Identify the various technical textiles used in the day to day life
- Visualize the usage of various fibres for specific application

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|--|--|--|

| iv. | | | | | |

Unit 1

Home textiles - Materials used – properties – Manufacturing techniques – products and applications – quality Requirements

Unit 2

Sports textiles – : Products - Materials used – Manufacturing techniques - properties – testing methods and application.- Active and Passive, electronic integrated sport textiles

Unit 3

Textiles for military and defense: Introduction, Applications of various textile structure in protective Clothing and Individual Equipment, Textiles Used in Defense Systems and Weapons, Testing and evaluation of various textile structures used in defense and military applications.

Unit 4

Geo-Textiles: Products - Materials used – Manufacturing techniques - properties – testing methods and application.

Agro Textiles: Products - Materials used – Manufacturing techniques - properties – classification and applications.

Unit 5

Oeko -Textiles: Products - Materials used – Manufacturing techniques - properties – applications.

Technical textiles for clothing application: Products - Materials used – Manufacturing techniques - properties –applications.

Textiles for packing application: Products - Materials used – Manufacturing techniques - properties –applications.

22BSTT56 - QUALITY EVALUATION FOR TECHNICAL TEXTILE

Total Hours: 45

2023

Course Objective

To enable the students to know about the properties to be tested in each stage of the product and acceptance level of the product quality.

Course Outcomes

- i. Acquisition of knowledge in basic working principles of testing instruments
- ii. Skill sets in preparing samples for various types of experiments and to conduct experiments.
- iii. Ability to analyze and interpret the data obtained from the testing instruments
- iv. Arrive at conclusions on quality based on the standards and present the results

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|--|
| | CO | | | | |

| PO | | | | | |
| i. | | | | M | |
| ii. | | | | M | |
| iii. | S | S | S | | |
| iv. | | | | | |

UNIT 1

Introduction - Textile testing - On-line and off-line testing techniques - Sampling techniques - Statistical techniques for fibre, yarns and fabrics - Test of significance - T and F test – Quality control charts for variables and attributes – Acceptance sampling – AQL – Humidity, standard RH and temperature for testing and mechanical processing - Measurement of moisture.

UNIT 2

Fibre Testing - Length characteristics - Bare sorter, digital fibrograph, HVI - Trash content determination - Trash analyser, trash and quality of yarn - Fibre fineness - Importance, fineness testers – Maturity - Importance, methods - Nep measurement - Fibre strength - Principle of measurements, importance, bundle and single fibre strength testers - Advance fibre information systems(AFIS)*.

UNIT 3

Yarn testing - Twist testers - Tension type, take-up twist testers, electronic twist tester - Yarn strength - Single thread strength testers, lea strength tester - Lea CSP - Yarn evenness - Definition - Classification of variation, methods of measuring evenness Yarn fault classifications – Classimat - Yarn appearance - Yarn hairiness measurement*.

UNIT 4

Fabric Testing - Crimp - Crimp tester - Fabric tensile strength testers - Ballistic tester, hydraulic bursting strength tester - Fabric abrasion resistance, fabric pilling - Drape – Drape meter - Stiffness - Stiffness tester - Crease resistance and crease recovery measurements - Permeability - Air permeability tester, water permeability tester - Objective evaluation of fabric handle - Fabric specification* - Cloth defects - Four point system - Shrinkage potential – Colour fastness testing.

UNIT 5

Garment testing- Seam strength, seam slippage, garment checking procedure, interlining - peel bond strength - Trims specification - Stitch specification - Size scale – Garment dimensions and tolerances - Quality of trims and accessories - Defects in garments and their remedies - A, B and C zones in a garment with respect to defects*.

22BSTT57 - TEXTILE QUALITY EVALUATION LABORATORY

Course Objectives

- Draw representative samples, perform testing of fibres, yarns and fabrics
- Interpret the results obtained for process control and product certification
- Perform experiments to improvise on applications; design or modify simple instruments; make use of advanced statistical techniques

Course Outcomes (COs)

1. Draw representative samples, perform testing of fibres, yarns and fabrics
2. Interpret the results obtained for process control and product certification
3. Perform experiments to improvise on applications; design or modify simple instruments; make use of advanced statistical techniques

| iv. | | | | | |

List of Experiments:

1. Measurement of Fibre length by Baer Sorter and Digital Fibro graph
2. Measurement of Fibre fineness and bundle strength testing by Stelo meter
3. Measurement of linear density of sliver, roving, and yarn and moisture regain of fibre sample.
4. Single and ply yarn twist measurement
5. Measurement of Single Thread Strength, Lea Strength and Impact strength of yarn and fabric
6. Measurement of Yarn evenness and imperfections and assessment using yarn appearance board
7. Measurement of Drape Coefficient of fabrics with different areal densities
8. Measurement of Fabric thickness, stiffness and crease recovery
9. Fabric tensile strength (Strip test and Grab test) and tear strength
10. Assessment of Fabric abrasion resistance and fabric pilling
11. Measurement of Fabric Air Permeability and bursting strength

22BSTT58 - TECHNICAL TEXTILES PRODUCT LABORATORY

Course Objectives

To identify and analyze the various technical textile products that are used commercially

Course Outcomes

Upon successful completion of this subject, the students should be able to:

- Identify the technical textile product and differentiate its category and application
- To identify the fibers /materials used and the manufacturing techniques
- To determine the properties and functions of the product

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

22BSTT59 – INTERNSHIP – II

Course Objectives

- To expose the students in the real time world
- To gain knowledge on the process, machinery and technology

Course Outcomes

After successful completion of this course, the students should be able to

- Identify the solution for industry related problems
- Understand the suitable process, machinery and technology for product manufacturing
- Summarize the results and submit a report.

Pre-requisites:

Students will undergo internship training in an established organization of Textile for a period of 3 weeks.

- At the end of internship training, students will submit a report of training undertaken.
- The student has to present their report to the Panel of members for evaluation.

SEMESTER VI

22BSTT61 - COSTING AND EX-IM MANAGEMENT

Course objectives

- To enable the students to learn about preparation of cost sheet, costing of yarn, fabric and garments.

Course Outcomes

Upon successful completion of this course the student would be able to

- Understand fundamentals of costing and construct cost sheet
- Understand the concepts of cost profit volume and even break analysis and method of standard costing
- Determine cost of yarn, fabric and garment
- Understand the foreign exchange mechanism and management of working capital
- Understand the concepts of preparation of budget

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| iii. | | | M | | |
| iv. | M | M | | M | M |

UNIT I

Cost accounting, elements of cost, classification of cost elements – examples from textile industry, methods of costing; cost sheet preparation

UNIT II

Cost profit volume analysis, breakeven analysis; standard costing, analysis of variance

UNIT III

Costing of yarn – material, labour, power and overhead expenses, allocation of overhead costs; costing of fabric; costing of garment

UNIT IV

Foreign exchange mechanisms, exchange rates; foreign exchange exposure management – risks, strategies to reduce risk; working capital management.

UNIT V

Budget, types of budgets, budgeting and control in textile industry.

22BSTT62 - ENTREPRENEURSHIP DEVELOPMENT

Course Objectives

- To create awareness and enhance skills in identifying opportunities, develop ideas and start business ventures.
- To emphasizes on entrepreneurial process.

Course Outcomes

Upon successful completion of this course the student would be able to,

- Gain knowledge on textile entrepreneurship.
- Understand the barriers of starting a small business.
- Learn the process of managing small and medium business

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| iv. | S | S | S | | |

UNIT I

Entrepreneurship: Internal and external factors, functions of an entrepreneur, entrepreneurial motivation and barriers, classification of entrepreneurship, theory of entrepreneurship, concept of entrepreneurship, development of entrepreneurship; culture, stages in entrepreneurial process.

UNIT II

Business plan development: Creativity and entrepreneurial plan - Idea generation, screening and project identification, creative performance, feasibility analysis: Economic, marketing, financial and technical - Project planning - Evaluation, monitoring and control segmentation - Creative problem solving - Heuristics, brainstorming, value analysis and innovation.

UNIT III

Institutional support for new ventures - Supporting Organizations: Incentives and facilities: Financial institutions and small-scale industries, Government Policies for SSIs, Angel investors, and private equity.

UNIT IV

Family and non-family entrepreneur - Role of professionals, professionalism v/s family entrepreneurs, role of woman entrepreneur - Venture capital - Nature and overview, venture capital process, locating venture capitalists.

UNIT V

Role of support institutions and management of small business - Director of industries - DIC, SIDCO, SIDBI, TIIC, MSME small industries, development corporation (SIDC), SISI, NSIC, NISBUED, SFC-Unicorn startups.

ELECTIVE COURSES (EC)

22BSTT35 (A) – CLOTHING COMFORT

Course Objectives

- Important characteristics of the fabric responsible for its comfort properties
- Different phenomena which take place in the fabric related to the comfort properties of the fabric

Course Outcome

Upon successful completion of this course the student would be able to understand,

- Criteria for comfort of fabrics
- Psychological and physiological comfort with respect to clothing
- Thermo physiological comfort requirements of human and the role of clothing.
- The behavior of different fabric in relation to heat and moisture transfer
- The low stress mechanical properties of fabric with respect to comfort to the wearer

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| iii. | M | | M | | S |
| iv. | | | | | |

Unit -1

Comfort – types and definition; human clothing system, comfort perception and preferences

Unit-2

Psychological comfort; neuro-physiological comfort-basis of sensory perceptions; measurement techniques - mechanical stimuli and thermal stimuli

Unit 3:

Thermo physiological comfort – thermoregulatory mechanisms of the human body, role of clothing on thermal regulations.

Unit-4

Heat and moisture transfer – moisture exchange, wearer's temperature regulations, effect of physical properties of fibres, behaviour of different types of fabrics,

Unit-5

Fabric tactile and mechanical properties - fabric prickliness, itchiness, stiffness, softness, smoothness, roughness, and scratchiness; predictability of clothing comfort performance

Text Books:

22BSTT35 (B) – COATED AND LAMINATED TEXTILE

Course Objectives

- To enable the students to understand need for coating of textiles, different methods of coating of textile fabrics

Course Outcome

Upon successful completion of this course the student would be able to understand,

- Polymers used for coating
- Rheology of coated polymers
- Methods of coating of textiles
- Application of coated fabrics
- Testing of coated fabrics

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|---|---|

| PO | | | | | |
| i. | S | M | | | |
| ii. | | | | M | |
| iii. | | | M | | M |
| iv. | | | | | |

Unit -1

Rubber-natural and synthetic, polyvinyl chloride, polyurethanes, acrylic polymers; adhesive treatment, radiation-cured coatings; materials and trends; textile fibres-spinning, woven fabrics, knitted fabrics, nonwoven fabrics

Unit-2

Rheological behavior of fluids; rheology of plastisols; hydrodynamic analysis of coating; clothing comfort, impermeable coating, breathable fabrics

Unit 3:

Coating features, methods of coating- knife coating, roll coating, dip coating, transfer coating, rotary screen printing, calendaring, hot-melt coating; general characteristics- tensile strength, elongation, adhesion, tear resistance, weathering behaviour, microbiological degradation, yellowing.

Unit-4

Synthetic leather, architectural textiles, fluid containers, tarpaulins, automotive air bag fabrics, carpet backing; textile foam laminates for automotive interiors; flocking fabrics for chemical protection; thermochromic fabrics, temperature adaptable fabrics, camouflage nets metal and conducting polymer, coated fabrics

Unit-5

Test methods for coated fabric evaluation; environmental norms for the chemicals used in coating industry.

22BSTT45 (A) - SMART AND WEARABLE TEXTILES

Course Objectives

- To impart knowledge on Smart and sustainable textiles
- To know the technology behind smart textiles

Course Outcomes

Upon successful completion of this course the student would be able to,

- Appreciate the use of smart textiles
- Understand the properties of smart textiles.
- Gain knowledge on the importance of sustainability.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |
| | 1 | 2 | 3 | | |
| PO | | | | | |
| i. | S | M | | | |
| ii. | | M | | | |
| iii. | M | | M | | |
| iv. | | | | | |

Unit -1

Smart technology for textiles and clothing – Introduction and Overview, development of smart technology for textiles and clothing – sensors/actuators, for signal transmission, processing and controls. Electrically active polymer materials – concepts of autonomic systems and materials, polymer materials as actuators or artificial muscle, peculiarity of polymer gel actuator, triggers for actuating polymer gels, electroactive polymer gels as artificial muscles, from electro-active polymer gel to electro-active elastomer with large deformation.

Unit-2

Introduction to phase change materials – Heat balance and thermo-physiological comfort, phase change technology, PCMs in textiles, textile treatment with PCM microcapsules, thermal performance, test methods, applications, future prospects of PCM in textiles and clothing. Intelligent textiles with PCMs – Basic information on PCMs, phase change properties of linear alkyl hydrocarbons, textiles containing PCM, Functions of Textile Structure with PCM.

Unit 3:

Mode of PCM performance in clothing, Manufacturing of textiles containing micro PCMs, Applications of textiles containing PCMs are Domestic textiles, Medical products, Automotive textiles, Air conditioning buildings with PCMs.

Unit-4

Embroidery and Smart textiles – Introduction, basics of embroidery technology – combined embroidery techniques. Embroidery machines, Embroidery for technical applications – tailored fibre placement, Embroidery technology used for medical textiles. Embroidered stamp – gag or innovation. Adaptive and responsive textile structures – Introduction, textiles and computing – the symbiotic relationship, the three dimensions of clothing and wearable information infrastructure, textiles and information processing, Georgia tech wearable motherboard,

Unit-5

Standards and test method for protective fabric performance - flame retardant finishes, liquid repellent finishes, antistatic, liquid repellent, antibacterial, UV protection, mite protection; manikinsthermal manikins, segmented thermal manikins; evaporative resistance measurement-moisture permeability index, skin model; concept of dynamic manikins; permeation resistance test-index of penetration and index of repellency; liquid tight integrity and gas tight integrity

2. Hongu T and O'Phillips G, 'New fibres' Ellis Horwood, New York.

22BSTT45 (B) - TEXTILE REINFORCED COMPOSITES

OBJECTIVES

To enable the students to learn about

- Reinforcements, matrices used for the composites
- Manufacture and testing of composites and
- Mechanics of failure of composites

OUTCOME

Upon completion of this course, the student shall be able to

- Select different types of textile reinforcements and matrices used for the manufacture of composites and their behaviours
- Evaluate the characteristics of composites

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|--|--|--|
| | CO | | | | |
| | 1 | 2 | | | |
| PO | | | | | |
| i. | S | | | | |
| ii. | M | M | | | |
| iii. | | M | | | |
| iv. | | | | | |

UNIT I REINFORCEMENTS

Manufacturing, properties and applications of Glass, Quartz, Boron, Silicon carbide, Carbon, HPPE and Aramid fibers.

UNIT II MATRICES

Preparation, Chemistry, Properties and applications of thermoplastic and thermoset resins- Unsaturated Polyester, Vinyl Ester, Epoxy, Phenolics, polyimides, polyurethanes, polyamides, Polypropylene, PEEK and Polycarbonate

UNIT III COMPOSITE MANUFACTURING

Composites manufacturing for both thermoplastics and thermosets- Hand layup, Filament Winding, Resin transfer moulding, prepregs and autoclave moulding, pultrusion, vacuum impregnation methods, compression moulding; post processing of composites and Composite design requirements

UNIT IV TESTING

Fibre volume and weight fraction, specific gravity of composites, tensile, flexural, impact, compression, interlaminar shear stress and fatigue properties of thermoset and thermoplastic composites

UNIT V MECHANICS

Micro mechanics, macro mechanics of single layer, macro mechanics of laminate, classical lamination theory, failure theories and interlaminar stresses

22BSTT54 (A) – INDUSTRIAL MANAGEMENT

Course Objectives

- To acquaint the students with the basic nature of management, its process, tasks and responsibilities of a manager
- To introduce the basics of managerial functions like human resources, marketing, finance and production

Course Outcome

Upon successful completion of this course the student would be able to,

- Elaborate on the HRM policies in an organization
- Provide examples on marketing using case studies
- Point out the functions of HR, Marketing, Finance and Production departments in an organization

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |
| | 1 | 2 | 3 | | |
| PO | | | | | |
| i. | | | M | | |
| ii. | | | | | |
| iii. | S | S | S | | |
| iv. | M | | | | |

UNIT I

Management: Science, theory and practice - the evolution of management thoughts - management as art - management as profession - professionalization of management in India - functions of management - levels of management - case analysis.

UNIT II

Human Resource Management: Introduction - HRM policies and roles - The importance of the human factor - HRM and its interaction with other functional areas - line and staff functions - role of HR manager - case analysis.

UNIT III

Marketing: Concept of marketing and marketing management, marketing as a business process - marketing environment, marketing mix - relationship of marketing department with production, finance, purchase and human resource department - demand and market - concepts of consumer marketing, industrial marketing and services marketing – marketing research, demand and supply – price determination - case analysis.

UNIT IV

Finance: Introduction: Financial, management and cost accounting - accounting concepts and conventions - concept of finance and functions of financial management; objectives of the firm; time value of money and risk - return relationship - case analysis.

UNIT V

Production: Production planning and control: production systems, types of production, re-planning and control functions, relations with other departments, efficiency of production planning and control – scheduling – GANTT charts - case analysis.

22BSTT54 (B) – APPAREL MARKETING AND MERCHANDISING

Course Objectives

- To understand the functions of merchandiser on production and retail perspective.
- To inculcate the knowledge of apparel product lines, development, pricing and sourcing.

Course Outcomes

Upon successful completion of this course the student would be able to,

- Develop the skill to analyze the functions, characteristics and requirements of a merchandiser.
- Diagnose the role of exporters, manufacturer, merchant exporter and job workers.
- Identify the suitable SCM procedure.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |
| | 1 | 2 | 3 | | |
| PO | | | | | |
| i. | M | | | | |
| ii. | | | M | | |
| iii. | S | S | S | | |
| iv. | | M | | | |

UNIT I

Merchandising: Definition – functions - division - role and responsibilities. Types of buyers - communications with the buyers – awareness of current market trends – product development – tech pack analysis - order confirmation process. Export Merchandising. Classification of exporters: Manufacturer, Merchant, Job worker (CM/CMT). Introduction to buying house.

UNIT II

Merchandiser's Role: Proto type to production model – samples, types of samples, sampling procedures, production planning, vendor based rationalization, order placement, in-house and sub-contractor units. Approval: types of approval, approval procedure, buyer approval and organizational approval. Record maintenance. Vendor evaluation and rating.

UNIT III

Marketing: Fashion consumer typologies, Maslow's hierarchy of needs, 4 P's, SWOT analysis, marketing research process, importance of marketing. Marketing mix – pricing, product and brand distribution channels. Market size, structure and environment.

UNIT IV

Marketing Research: Definition, role in apparel business, use of research findings for marketing decisions and action plans. Marketing research techniques – translation of business

and marketing problems into research issues and design, survey design, data types and collection methods, sample design and statistical inference. Model building and analysis methods.

UNIT V

Sourcing: Definition, types and methods of sourcing. Sourcing decision in practice – Bought out component.

Supply Chain Management: Introduction and benefits. Push/pull concepts. Supply Chain strategies. Use of barcoding and RFID. **Warehousing:** Introduction, types and importance.

TEXT BOOKS:

22BSTT55 (A) - TOTAL QUALITY MANAGEMENT

Course Objectives

- To make the students understand the basic concepts of total quality management and appreciate its importance in today's business environment.
- To enable them to acquire required diagnostic skills and use various quality tools.
- To familiarize the students about the Quality Management System.

Course Outcomes

- Capable of applying TQM concepts for improving the quality of products and services.
- Use tools and techniques of TQM for continuous improvement in quality.
- Implement Quality Management System.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |
|------|--|---|---|--|--|
| | CO | | | | |
| | 1 | 2 | 3 | | |
| PO | | | | | |
| i. | | | | | |
| ii. | | | | | |
| iii. | | | | | |
| iv. | S | M | S | | |

UNIT1 - Introduction

Introduction and basic concepts, Definition of quality, Dimensions of quality, Evolution of TQM, TQM frame work*, Cost of Quality.

UNIT 2 - TQM Implementation

Leadership for TQM, Deming's quality principle, TQM implementation, PDCA cycle, Quality Circles, Quality Council, Supplier Partnership*.

UNIT 3 - Process approach to TQM

Process approach*, Juran's Trilogy, Taguchi's loss function, Kaizen, Quality by design, 5S, 5M.

UNIT 4 - Tools and Techniques

7 Old quality control tools, Total productive maintenance*, Failure mode and effect Analysis, POKAYOKE, Six Sigma, Toyota and Six Sigma.

UNIT 5 - Quality Management Systems: Management systems for TQM, ISO 9000 & 14000
Quality management systems, Auditing and certification Process*- Quality Awards.

22BSTT55 (B) – RETAIL MANAGEMENT

Course Objectives

- To give an understanding to the students about the significant role of retailing in the marketing system.
- To give inputs to gain insights on the issues involved in organizing and establishing a retail format.
- To enable the students to understand about the pricing and promotion strategies in retailing.

Course Outcomes

- Able to effectively perform the role of a store manager.
- Able to decide on the length of product assortment based on the store format and shoppers' profile.
- Skill of identifying a right store location for any given retail format.
- Skill of designing promotion strategies to promote the retail outlet.
- Skill of designing appropriate atmospherics that enhances the shopping experience suits the outlet's image.
- Skill of appropriately choosing a pricing strategy that doesn't exceed the shoppers' reference prices.

| | MAPPING OF COURSE OUTCOMES AND PROGRAMME OUTCOMES (S – Strong, M-Medium) | | | | |

| PO | | | | | |
| i. | | | S | | |
| ii. | S | | | m | |
| iii. | | | | | M |
| iv. | | M | | | |

UNIT 1

Concept of retailing, Functions of retailing, Terms and Definition, Retail formats and types, Retailing Channels, Non-Store Retailing- On-line sales, Retail Industry in India, Importance of retailing, changing trends in retailing. FDI in Indian retail and its importance* - Strategies of international retailers in India*

UNIT 2

Importance of Retail locations, Types of retail locations, Factors determining the location decision, Steps involved in choosing a retail locations, Measurement of success of location, Retail value chain, Retail market segmentation, targeting and positioning

UNIT 3

Meaning of Merchandising, Factors influencing Merchandising, Functions of Merchandising Manager, Merchandise planning, Merchandise buying, Analysing Merchandise performance

UNIT 4

Store layout and Design, Visual Merchandising, Promotions Strategy, Retail Marketing Mix, Retail Communication Mix, Store administration, Premises management, Inventory Management, Store Management, Receipt Management, Customer service, Retail Pricing, Factors influencing retail prices, pricing strategies, controlling costs

UNIT 5

Changing nature of retailing*, organized retailing*, Modern retail formats, E-tailing, Challenges faced by the retail sector*
